LETTER OF TRANSMITTAL

DEPARTMENT OF COMMERCE,
BUREAU OF THE CENSUS,
Washington, D. C., December 20, 1934.

SIR: I transmit herewith a report on the Negro population of the United States, entitled "Negroes in the United States: 1920-32", prepared under the supervision of Z. R. Pettet, chief statistician for the Division of Agriculture, by Charles E. Hall, specialist in Negro statistics, assisted by Charles W. White. This report supplements the volume, "Negro Population in the United States, 1790-1915", published by the Bureau of the Census in 1918. This, I believe, will prove to be a very valuable source of information regarding the progress and status of the Negro race in the United States.

The tabulations for this report were made by a corps of Negro clerks.

WILLIAM LANE AUSTIN,
Director of the Census.

Hon. DANIEL C. ROPER,
Secretary of Commerce.

Negroes in the United States
1920-1932

LETTER OF TRANSMITTAL

TO THE PRESIDENT OF THE UNITED STATES
FROM THE SECRETARY OF THE DEPARTMENT OF COMMERCE
SUBJECT: REPORT ON THE ECONOMIC POSITION OF THE NEGRO
IN THE UNITED STATES, 1920-1932

Washington, D. C., January 1, 1933
The enclosed report, prepared by the Bureau of Economic
Geography and Statistics, Department of Commerce,
contains a detailed study of the economic position of the
Negro in the United States during the period 1920-1932.
It is respectfully recommended that it be placed in the
files of the Department of Commerce.

CONTENTS

MAP OF UNITED STATES SHOWING GEOGRAPHIC DIVISIONS.....	Page II
LETTER OF TRANSMITTAL.....	III
INTRODUCTION.....	XV
Source and scope of data.....	XV
Color and race.....	XV
Urban and rural areas.....	XV
Rural-farm and rural-nonfarm area.....	XVI
Fewer 75 percent Negro counties.....	XVI
School attendance.....	XVI
Agriculture.....	XVI
Negroes engaged in principal professions.....	XVI
Negro home ownership.....	XVI
Decline of Negro illiteracy.....	XVI
Marital condition in principal cities.....	XVI
Infant mortality.....	XVI
Death rates from all causes.....	XVI
Retail stores operated by Negro proprietors.....	XVI

Chapter I.—NEGRO POPULATION AND GROWTH IN UNITED STATES

Summarization of chapter.....	Page 1
TABLES	
1. Negro, white, and other population of the United States, with decennial increases: 1790 to 1930.....	1
2. Population of the United States and increase, by classes: 1930, 1920, and 1910.....	2
3. Increase in Negro and white population, by 20- and 70-year periods: 1790 to 1930.....	2
4. Negro population, revised figures of increase: 1790 to 1930.....	2

Chapter II.—GEOGRAPHIC DISTRIBUTION AND INCREASE

Negro distribution by sections and divisions.....	3
Growth of Negro population and distribution of increase, by divisions and sections.....	3
Negro distribution, by States.....	3
Negro population per square mile in 1930.....	3

TABLES

1. Increase by 20-year periods for Negro and white population, by sections, and southern divisions: 1790 to 1930.....	4
2. Geographic distribution of population, by race and nativity, by sections, and divisions: 1930.....	4
3. Total and Negro population, by sections, and southern divisions: 1830 to 1930.....	5
4. Rank of States according to Negro population: 1790 to 1930.....	6
5. Rank of States in Negro, white, and total population: 1930.....	6
6. States arranged by percent increase in Negro population: 1920 to 1930.....	7
7. Increase in Negro and white population, by sections, and divisions: 1920 to 1930.....	7
8. Density of Negro and white population, total and rural, by sections, and southern divisions: 1930.....	7
9. Percent distribution of Negro population, by sections, and southern divisions: 1790 to 1930.....	7
10. Negro and white population per square mile, 1930, 1920, and 1910, and rural population, by States: 1930.....	8
11. Negro and foreign-born white population, by sections, and by southern divisions, and States: 1930 and 1920.....	8
12. Negro and white population, by sections, divisions, and States: 1790 to 1930.....	9
13. Increases in the Negro and white population by sections, divisions, and States: by periods, 1790 to 1930.....	12

Chapter III.—PROPORTION IN TOTAL POPULATION

Decrease in proportion of Negroes.....	13
Proportion of Negroes in the South.....	13
Proportion of Negroes in the North.....	13

TABLES

1. Percentage of total Negro population and number of Negroes per 1,000 whites, by sections, and southern divisions: 1790 to 1930.....	Page 13
2. Percent distribution, by racial classes, for sections, and divisions: 1930 and 1920.....	14
3. Negro and white population, by States, ranked according to Negro percentage of total population: 1930.....	14
4. Percent Negro in total population at each census, by divisions, and States: 1790 to 1930.....	15
5. Number of Negroes per 100,000 whites at each census, by sections, divisions, and States: 1790 to 1930.....	16

Chapter IV.—NATIVITY

Explanation of terms used.....	17
Native and foreign-born Negro population.....	17
Year of immigration to the United States.....	17
Place of residence of foreign-born Negro population.....	17
Native Negro population by division of birth and division of residence.....	17
Gain or loss of native Negro population by divisions.....	17
Place of birth and residence, 1930.....	17

MAP

Percentage of Negroes in the total population, by States: 1930.....	Page 18
---	------------

CHARTS

Distribution of the total population, by color and nativity: 1850 to 1930.....	Page 19
Negro population, by States: 1930 and 1920.....	20
Color, nativity, and parentage, by States: 1930.....	20

TABLES

1. Native and foreign-born Negro population and foreign-born white population of the United States: 1900 to 1930.....	Page 20
2. Negro population distributed as born in division of residence, in other divisions, or in foreign countries, by divisions: 1930.....	21
3. Country of birth of the foreign-born Negro population of the United States: 1930 and 1920.....	21
4. Year of immigration of the foreign-born Negro population of the United States, by sex.....	21
5. Summary of data indicating results of the migration of the native Negro and white population North and South, and East and West: 1920 to 1930.....	21
6. Number and percent native and foreign born in the total Negro population, with classification of native according to whether born in State of residence or elsewhere, for the United States: 1910 to 1930.....	21
7. Parentage of the Negro and the white population of the United States: 1930 and 1920.....	22
8. Native Negro and white population classified by section of residence, and by section of birth: 1930.....	22

	Page
9. Native Negro population, by division of birth and division of residence, 1930, with gain or loss through interdivisional migration, 1930, 1920, and 1910.....	23
10. Foreign-born Negro population: 1930, 1920, and 1910....	23
11. Negro and white population distributed as born in State of residence, in other States, or in foreign countries, by States: 1930.....	24
12. Migration of Negroes out of and into the South, by sections, divisions, and States: 1910-30.....	25
13. Native Negro population by State of birth and State of residence, 1930, with gain or loss through interstate migration, 1930, 1920, and 1910.....	26
14. Native Negro population of each division and State, by division and State of birth: 1930.....	27
15. Negro population distributed as born in State of residence, in other States, or in foreign countries, for cities of 50,000 or more having at least 5,000 Negroes, 1930, with percentages for 1930, 1920, and 1910.....	32
16. Native Negro population by State of birth, for cities of 50,000 or more having at least 5,000 Negroes: 1930....	34
17. Native Negro population born in each State, distributed according to selected States of residence: 1930.....	40
18. Native Negro population by State of residence and State of birth: 1930.....	44

Chapter V.—URBANIZATION

Definition of terms used.....	48
Urban and rural Negro population.....	48
Rural and urban Negro population by sections and divisions.....	48
Urban rural-farm and rural-nonfarm Negro population....	48
Negro population in the largest cities.....	48

TABLES

1. Negro and white population, urban (by classes of cities and other urban places) and rural, for the United States: 1930.....	49
2. Racial composition of the urban and rural population for the United States: 1930, 1920, and 1910.....	50
3. Increase in urban and rural population for the United States: 1910 to 1930.....	50
4. Percent, urban and rural, in the Negro population, by sections and southern divisions: 1930, 1920, and 1910.....	50
5. Percent distribution of Negro and white population, urban and rural, and Negro percentage in the urban and rural population, by sections and southern divisions: 1930 and 1920.....	50
6. Urban and rural population, by racial classes, by sections, and southern divisions: 1930.....	51
7. Negro and white population, urban and rural, by sections, divisions, and States: 1930.....	52
8. Negro population, urban and rural, by sections, divisions, and States: 1930, 1920, and 1910.....	53
9. Negro and white population for cities of 100,000 inhabitants or more: 1930.....	54
10. Cities having a Negro population of 10,000 or more in 1930, with comparative figures for 1920 and 1910, and percent increase in white population, 1910 to 1930.....	55
11. Negro population of cities and other urban places: 1930 and 1920.....	56
12. Negro population by wards or equivalent subdivisions of cities having 50,000 or more inhabitants of whom at least 20,000 are Negroes: 1930.....	67

Chapter VI.—THE "BLACK BELT"

Diffusion of Negro population.....	70
Area of relatively high proportion of Negroes.....	70
Decrease in the number of counties and population in the "Black Belt".....	70
"Black Belt" counties, by States.....	70
Southern counties by proportion of population, Negro: 1930.....	70

TABLES

1. Number of counties reporting Negro inhabitants, 1930, by sections, divisions, and States.....	70
2. Number of counties in which the Negro population was 50 percent or more of the total population, by divisions, and States: 1880-1930.....	71

	Page
3. Number and area of counties in which the Negro population was 50 percent or more of total population, by divisions, and States: 1930, 1920, and 1910.....	71
4. Counties classified according to Negro population, by sections, and southern divisions: 1930.....	71
5. Negro and white population of counties in which the Negro population was 50 percent or more of total population, by divisions, and States: 1900 to 1930....	72
6. Southern county areas classified according to specific percentage Negro in the population, by divisions, and States: 1930.....	72
7. Negro population in counties in the South classified according to percent Negro, by divisions, and States: 1930, 1920, and 1910.....	73
8. Negro percentage of total population, number of Negroes per square mile, and land area, by selected counties: 1930, 1920, and 1910.....	74
9. Percent Negro and number of Negroes per 1,000 whites for the counties having a population of 50 percent or more Negro, by States: 1930 and 1920.....	77

Chapter VII.—SEX DISTRIBUTION

Ratios of Negro males to females.....	78
Sex ratios by sections and divisions.....	78
Sex ratios in urban and rural areas.....	78
Sex ratios in the "Black Belt".....	78
Sex ratios in cities.....	78

TABLES

1. Negro population of the United States by sex: 1820 to 1930.....	78
2. Population of the United States by sex, color, and nativity: 1930.....	78
3. Sex ratios of Negro and white population for the United States: 1820 to 1930.....	78
4. Negro population classified by sex, 1930; by sex ratios, 1900 to 1930; and sex ratios for white classes, 1930; by sections, and southern divisions.....	79
5. Negro and white population by sex, with the number of males per 100 females, for classes of urban places, by divisions: 1930.....	79
6. Negro population, by sex, with the number of males per 100 females, for classes of urban places: 1930.....	79
7. Sex ratios by classes of urban places, for the Negro and white population: 1930.....	79
8. Sex ratios of urban and rural population, by racial classes: 1930 and 1920.....	80
9. Negro population and sex ratios of counties having 50 percent or more Negroes and counties having less than 50 percent Negro population, by sections, southern divisions, and southern States: 1930.....	80
10. Sex ratios of Negro and white population, urban and rural, by sections, and southern divisions: 1930.....	80
11. Negro and white population, urban and rural, by sex, with the number of males per 100 females, by divisions: 1930 and 1920.....	81
12. Negro population by sex, with number of males per 100 females, by divisions, and States: 1900 to 1930.....	82
13. Urban and rural Negro population by sex, with number of males per 100 females, and percent urban, by sections, divisions, and States: 1930.....	83
14. Negro population with number of males per 100 females, by States, arranged according to sex ratios: 1930, 1920, 1910, and 1900.....	84
15. Negro population by sex, with males per 100 females for the 80 cities having 10,000 or more Negro inhabitants, 1930, 1920, and 1910; and males per 100 females in the white population: 1930.....	85
16. Negro population by sex, with number of males per 100 females, for the 183 cities and urban places having 2,500 to 10,000 Negro inhabitants: 1930.....	86

Chapter VIII.—AGE DISTRIBUTION

The age classification.....	87
Distribution by 5-year age groups.....	87
Median age.....	87
Age by sex.....	87
Urban, rural-farm, and rural-nonfarm population.....	87
Number of males per 100 females by age groups.....	87
Age distribution by color and nativity.....	87

TABLES

	Page
1. Population by 5-year age periods, by color, by sections: 1930.....	88
2. Percent distribution by age for the population of the United States, by color and nativity: 1930.....	88
3. Median ages, by color, nativity, and sex, for the United States: 1930 and 1920.....	88
4. Urban, rural-farm, and rural-nonfarm Negro population, classified by 5-year age periods, by sections: 1930.....	89
5. Population classified by color and 5-year age periods, for the United States: 1930 and 1920.....	89
6. Cumulative age of the population by single years up to 51 percent, by color and nativity, for the United States: 1930.....	90
7. Negro population by 5-year age periods, by sex, for the United States: 1930, 1920, and 1910.....	90
8. Cumulative population and percent distribution by age groups, by color, and sex, for the United States: 1930.....	91
9. Negro population under and over 25 years of age for the urban, rural-farm and rural-nonfarm areas: 1930 and 1920.....	91
10. Number of males per 100 females, by 5-year age periods and by color, for the United States: 1930 and 1920.....	91
11. Negro population classified by sex and single years of age, with the number of males per 100 females: 1930 and 1920.....	91
12. Urban, rural-farm, and rural-nonfarm population by 5-year age periods, color, and sex, for the United States: 1930 and 1920.....	93
13. Percent distribution by 5-year age periods, by color, and sex, for the urban, rural-farm, and rural-nonfarm population of the United States: 1930 and 1920.....	96
14. Negro population in urban, rural-farm, and rural-nonfarm areas, by sex, and single years of age, and by sex, for the United States: 1930.....	97
15. Negro population classified by 5-year age periods, by divisions, and States: 1930 and 1920.....	98
16. Negro population classified by 5-year age periods, and sex, and by divisions, and States: 1930.....	103
17. Negro population classified by single years of age up to 29, by sex, and by States: 1930.....	108
18. Age by single years from 60 to 79, for the Negro population, by sex, for States having at least 100,000 Negroes: 1930.....	110
19. Negro population for the urban, rural-farm, and rural-nonfarm areas, by 5-year age periods, sex, and States: 1930.....	111
20. Age distribution by 5-year age periods with single years under 5, by color, and sex, for the 80 cities having 10,000 or more Negro inhabitants: 1930.....	123
21. Age distribution by single years up to 29, and from 60 to 79 years, for the Negro population, by sex, for the 15 cities having at least 50,000 Negroes: 1930.....	144

Chapter IX.—MARITAL CONDITIONS

The marital inquiry.....	146
Marital condition and sex.....	146
Marital condition and age.....	146
The median age at marriage.....	146
Marital condition in urban, rural-farm, and rural-nonfarm areas.....	146

TABLES

1. Median age at marriage, by sex, color, and nativity, for the United States: 1930.....	146
2. Number and increase in the married and divorced in the Negro population 15 years old and over: 1900 to 1930.....	147
3. Ratio of males to females of the Negro population 15 years old and over, 1890 to 1930; by urban, rural-farm, and rural-nonfarm sections, and southern divisions, 1930.....	147
4. Marital condition of the population 15 years old and over, by sex, and racial classes, for the United States: 1910 to 1930.....	147
5. Percent distribution, by marital condition, for the population 15 years old and over, by sex, racial classes, and 5-year age periods, for the United States: 1930.....	147
6. Marital condition of the Negro population 15 to 34 years old, by sex, and single years of age, for the United States: 1930.....	148

Page

7. Marital condition of the total population, by sex, and racial classes, and 5-year age periods, for the United States: 1930.....	14
8. Marital condition of the urban, rural-farm, and rural-nonfarm Negro population 15 years old and over, by sex, and 5-year age periods, for the United States: 1930.....	149
9. Marital condition of the Negro population 15 years old and over, by sex, by sections, divisions, and States: 1930.....	150
10. Percent distribution by marital condition of the Negro male population 15 years old and over, by sections, divisions, and States: 1900 to 1930.....	151
11. Percent distribution by marital condition of the Negro female population 15 years old and over, by sections, divisions, and States: 1900 to 1930.....	152
12. Marital condition of the Negro population 15 years old and over, by sex, and 5-year age periods, by divisions, and States: 1930.....	153
13. Marital condition of the Negro population 15 to 34 years old, by sex, and single years of age, by the Southern divisions, and States: 1930.....	165
14. Marital condition of the urban, rural-farm, and rural-nonfarm Negro population 15 years old and over, by sex, and 5-year age periods, by geographic divisions: 1930.....	170
15. Percent married in the urban, rural-farm, and rural-nonfarm Negro population 15 years old and over, by sex, and 5-year age periods, by geographic divisions: 1930.....	172
16. Marital condition of the Negro population 15 years old and over, by sex, and 5-year age periods, for cities having 10,000 or more Negro inhabitants: 1930.....	172
17. Percent distribution by marital condition of the Negro population 15 years old and over, by sex, for cities having 10,000 or more Negro inhabitants: 1930 and 1920.....	183
18. Marital condition of the Negro population 15 years old and over, by sex, for cities having 5,000 to 10,000 Negro inhabitants: 1930.....	184
19. Marital condition of the Negro population 15 years old and over, by sex, for cities and other urban places having less than 5,000 Negro inhabitants: 1930.....	185

Chapter X.—FERTILITY; PROPORTION OF CHILDREN TO WOMEN OF CHILDBEARING AGE

Children under 5 years of age per 1,000 women.....	201
Children under 5 years of age per 1,000 women, in urban, rural-farm, and rural-nonfarm areas.....	201
Children under 5 years of age per 1,000 married women.....	201

TABLES

1. Number, increase, and proportion of Negro and white women 15 to 44 years of age, and of children 10 years of age, under 5, and under 1, for the United States: 1900 to 1930.....	201
2. Number of children under 5 years per 1,000 women 15 to 44 years of age, by color, sections, and Southern divisions: 1900 to 1930.....	202
3. Negro and white women 15 to 44 years of age and children under 5 years with number of children per 1,000 women, for urban, rural-farm, and rural-nonfarm areas, by sections: 1930.....	202
4. Negro women 15 to 44 years of age, and Negro children under 5 years, with number of Negro and white children per 1,000 women: 1900 to 1930.....	202
5. Negro and white women 15 to 44 years of age and children under 5 years, by nativity, with number per 1,000 women: 1930.....	202
6. Negro and white married women 15 years of age and over, and children under 5 years, with number of children per 1,000 women, by sections: 1910 to 1930.....	202
7. Number of Negro and white children under 5 years per 1,000 women 15 to 44 years of age, by Southern divisions, and States: 1900 to 1930.....	203
8. Negro and white women 15 to 44 years of age, children under 5 years, and number of children per 1,000 women, by divisions, and States: 1930 and 1920.....	204
9. Negro women 15 to 44 years of age, Negro children under 5 years, and number of Negro children per 1,000 women, for urban, rural-farm, and rural-nonfarm areas, by sections, divisions, and States: 1930.....	205

	Page
10. Negro and white women 15 to 44 years of age, children under 5 years, and number of children per 1,000 women, in the 65 cities of 50,000 or more inhabitants having in 1930 a Negro population of 10,000 or more: 1930 and 1920.....	206
11. Negro women 15 to 44 years of age, and Negro children under 5 years, with number of Negro children per 1,000 women in the 147 cities having 5,000 or more Negro inhabitants: 1930.....	207

Chapter XI.—SCHOOL ATTENDANCE

The school attendance inquiry.....	208
Increase in school attendance.....	208
School attendance by single years of age.....	208
School attendance by sex.....	208
School attendance in urban and rural areas.....	208
School attendance by sections, divisions, and States.....	208
School attendance in cities.....	208
School attendance and gainful employment.....	208

TABLES

1. School attendance, by color, and nativity, for the United States: 1930.....	209
2. School attendance of the Negro and white population of the United States, by age periods: 1930.....	209
3. Negro school attendance, by single years of age from 5 to 20, by sex, and percent of Negroes and whites in school, for the United States: 1930.....	209
4. School attendance of Negroes by single years of age from 5 to 20, by sex, for the United States: 1930, 1920, and 1910.....	209
5. Negro population from 5 to 20 years of age, attending and not attending school, and percentages for Negroes and whites, by sex and age periods: 1930 and 1920.....	210
6. Percent of increase in Negro population 5 to 20 years and in number attending school by age periods, for the United States: 1910 to 1930.....	210
7. Negro children 7 to 15 years of age attending school ranked by number and percent, with the percentage of white children attending school, in cities having 50,000 or more Negro inhabitants: 1930.....	210
8. The number and percent attending school for Negroes and whites from 5 to 20 years, by geographic divisions, and sections: 1930.....	210
9. Negro and white population from 5 to 20 years of age attending school and not attending school, by age periods, for the United States: 1930 and 1920.....	211
10. School attendance of Negro and white population from 5 to 20 years, by age periods, and sections: 1930 and 1920.....	211
11. School attendance of the Negro population by age periods, and sex, for the urban, rural-farm, and rural-nonfarm areas of the United States: 1930.....	212
12. School attendance of Negro population from 7 to 20 years, by age periods, in urban and rural communities, by sections, and Southern divisions: 1930.....	212
13. School attendance of Negro children 7 to 15 years of age in cities having 25,000 or more Negro inhabitants: 1930.....	212
14. School attendance of Negro and white population by single years of age from 5 to 20, by sections: 1930.....	213
15. School attendance of the Negro population from 7 to 20 years of age, by sections, divisions, and States: 1930, 1920, and 1910, and by age periods: 1930.....	214
16. School attendance of the Negro population by single years of age from 5 to 20, by States: 1930.....	215
17. School attendance of Negro population, by age periods, and sex, for urban, rural-farm, and rural-nonfarm areas, by States: 1930.....	217
18. School attendance of Negro and white population by age periods, by sections, divisions, and States: 1930.....	219
19. School attendance of Negro population by age periods, and sex, for cities of 500,000 or more inhabitants: 1930.....	221
20. School attendance of Negro population 5 to 20 years of age by single years, for cities of 500,000 or more inhabitants: 1930 and 1920.....	222
21. Negro population, attending and not attending school, by age periods, for cities of 25,000 or more inhabitants, which had a Negro population of 1,000 or more: 1930.....	223

	Page
22. School attendance for the Negro population, 10 to 24 years old, by sex, age, and occupational status for urban, rural-farm, and rural-nonfarm areas: 1930.....	226
23. School attendance for the Negro population 10 to 24 years old, by sex, age, and occupational status, for the Southern States: 1930.....	227

Chapter XII.—ILLITERACY

The illiteracy classification.....	229
Color and nativity.....	229
Illiteracy by sex.....	229
Illiteracy by age.....	229
Illiteracy by sections, geographic divisions, and States.....	229
Illiteracy in counties and cities.....	230
Urban and rural illiteracy.....	230

TABLES

1. Illiteracy in the population 10 years old and over, by color, and nativity, for the United States: 1930 and 1920.....	230
2. Illiteracy in the urban, rural-farm, and rural-nonfarm Negro population 10 years old and over, by age groups, by sections: 1930.....	230
3. Illiteracy in the population 10 years old and over, by color, and age groups, for the United States: 1930 and 1920.....	230
4. Illiteracy in the population 10 years old and over, by color, nativity, and sex, for the United States: 1870 to 1930.....	231
5. Illiteracy in the population 21 years old and over, by color, nativity, and sex, for the United States: 1900 to 1930.....	232
6. Illiteracy in the Negro and foreign-born white population 10 years old and over, with country of birth, for the United States: 1930.....	232
7. Illiteracy in the population 10 years old and over, by color and nativity, by sections, and southern divisions: 1930, 1920, and 1910.....	233
8. Illiteracy in the Negro population 10 years old and over, by sections, and southern divisions: 1930, 1920, and 1910.....	233
9. Increase in Negro population and decrease in number illiterate, by sex, by sections, and southern divisions: 1920 to 1930.....	233
10. Illiteracy in the Negro and white population 21 years old and over, by sections, and southern divisions: 1930.....	233
11. Increase in Negro population, and decrease in Negro illiterates for the United States in each age group: 1910 to 1930.....	233
12. Illiteracy in the Negro population, by age groups, by sections, and southern divisions: 1930.....	234
13. Illiteracy of Negro children 10 to 14 years of age, and percent of illiteracy of Negro and white children, by States: 1930.....	234
14. Illiteracy in Negro population and percent illiteracy in Negro and white population, by sex, and age groups, by sections: 1930.....	235
15. Illiteracy in the Negro population 10 years old and over, by sex, by sections, and southern divisions: 1930, 1920, and 1910.....	235
16. Illiteracy in the Negro population 10 years old and over, by sex, and age groups, for the United States: 1900 to 1930.....	236
17. Illiteracy in the Negro population 10 years old and over, by sex, by sections, and divisions: 1930.....	236
18. Percent illiterate in Negro population 10 years old and over, 1930, 1920, and 1910, and in native and foreign-born white population, by States: 1930.....	236
19. Illiteracy per 1,000 population (Negro and white), 10 years old and over, by sections, and southern divisions: 1930, 1920, and 1910.....	236
20. Ratios of illiteracy in the Negro and white population 10 years old and over, by age groups, for the United States: 1930, 1920, and 1910.....	237
21. Illiteracy in the Negro and white population 10 years old and over in the 15 cities having over 50,000 Negro inhabitants: 1930.....	237
22. Percent illiterate in the Negro population 10 years old and over, by sex, and age groups, by sections, and southern divisions: 1930 and 1920.....	237

	Page
23. Percent illiterate in the Negro, native white, and foreign-born white population 10 years old and over, by age groups, by sections, and southern divisions: 1930 and 1920.....	237
24. Illiteracy in the Negro population 10 years old and over, and percent illiterate in the Negro and white population, in the urban, rural-farm, and rural-nonfarm areas, by sections, and divisions: 1930.....	238
25. Counties in which 25 percent or more of the Negro population 10 years old and over is illiterate: 1930.....	238
26. Illiteracy in the Negro and white population 10 years old and over in the 80 cities having 10,000 or more Negro inhabitants: 1930.....	239
27. Illiteracy in the population 10 years old and over, by color, and nativity, by sections, divisions, and States: 1930.....	240
28. Percent illiterate in the population 10 years old and over, by sex, color, and nativity, by sections, divisions, and States: 1930, 1920, and 1910.....	241
29. Illiteracy in the population 21 years old and over, by color, and nativity, by divisions, and States: 1930.....	242
30. Illiteracy in the Negro population 10 years old and over, by sex, by sections, divisions, and States: 1930.....	243
31. Illiteracy in the Negro population 10 years old and over, by sex, and by age groups, by sections, divisions, and States: 1930.....	244
32. Illiteracy in the population 10 years old and over, by age groups, color, and nativity, by divisions, and States: 1930.....	246
33. Illiteracy in the urban, rural-farm, and rural-nonfarm Negro population 10 years old and over, 1930, and in cities of 25,000 or more inhabitants and small cities and country districts, by sections, divisions, and States: 1930 and 1920.....	250
34. Illiteracy in the urban, rural-farm, and rural-nonfarm population 10 years old and over, by color, and nativity, 1930; and percent illiteracy in the urban and rural, 1920, by sections and divisions.....	251
35. Illiteracy in the population 10 years old and over, by color, and nativity, for cities of 100,000 or more: 1930 and 1920.....	252

Chapter XIII.—FAMILIES

The family classification.....	253
Size of families.....	253
Families classified by number of children.....	253
Families with lodgers.....	253
Age of head of the family.....	253
Ownership of homes.....	253
Value of owned nonfarm homes and monthly rentals of rented nonfarm homes.....	253
Employment status of homemaker.....	254
Families having radio sets.....	254
Number of gainful workers per family.....	254

TABLES

1. Families by color, and nativity of head, with total population, by color, and nativity, for the United States: 1930.....	254
2. Nonfarm and farm homes of Negro families for the United States: 1930, 1920, and 1910.....	254
3. Nonfarm homes of Negro families, by value or monthly rental, for the United States: 1930.....	254
4. Negro families, by size, for the United States: 1930.....	254
5. Families having man head, classified by age, color, and nativity of head, for the United States: 1930.....	254
6. Tenure of homes, by color of head of family for the United States: 1930, 1920, and 1900.....	254
7. Families classified by number of children under 10 and under 21 years old, by color, and nativity of head, for the United States: 1930.....	255
8. Families classified according to number of gainful workers, by color, and nativity of head, for the United States: 1930.....	255
9. Families classified according to number of lodgers, by color, and nativity of head, and by tenure, for the United States: 1930.....	255
10. Families with homemaker, by color, and nativity of head, and employment status of homemaker, for the United States: 1930.....	255
11. Percent of homes owned by Negro families, by sections: 1930, 1920, and 1910.....	255
12. Median size of urban, rural-farm, and rural-nonfarm Negro families, by divisions, and States: 1930.....	255

	Page
13. Negro families having radio set, in urban, rural-farm, and rural-nonfarm areas: 1930.....	256
14. Farm and nonfarm homes of Negro families, by sections: 1930.....	256
15. Families by tenure, by color, and nativity of head, with total population by color, and nativity, for the United States: 1930.....	256
16. Tenure of farm and nonfarm homes of Negro families, for the United States: 1930, 1920, 1910, and 1900.....	257
17. Families classified by sex of head, by color, and nativity, for the United States: 1930.....	257
18. Percent of homes owned and rented, by color, and nativity of head of family, for the United States: 1930, 1920, 1910, and 1900.....	257
19. Families by color, and nativity of head, with total population by color, and nativity, for the United States: 1930, 1920, 1900, and 1890.....	258
20. Negro families classified by number of children under 10 years old, by tenure, urban, rural-farm, and rural-nonfarm families, for the United States: 1930.....	258
21. Negro families having radio set, by sections, divisions, and States: 1930.....	259
22. Median size of family, and median value or rental of nonfarm homes, by color, and nativity of head, for the United States: 1930.....	259
23. Families having servants living in the home, but no lodgers, by color, and nativity of head, for the United States: 1930.....	259
24. Negro home owners, by sections, divisions, and States: 1930 and 1920.....	260
25. Population, number of owned homes, and number of persons per home, by color, sections, divisions, and States: 1930 and 1920.....	261
26. Homes of Negro families by tenure, by sections, divisions, and States, 1930 and 1920; with percent of total for 1930, 1920, and 1910.....	262
27. Urban, rural-farm, and rural-nonfarm homes of Negro families, by tenure, by sections, divisions, and States: 1930.....	263
28. Homes of Negro families by tenure, by sections, divisions, and States: 1930, 1920, 1910, and 1900.....	264
29. Owned nonfarm homes of Negro families, by value, with median value, by sections, divisions, and States: 1930.....	268
30. Percent distribution of nonfarm homes of Negro families, by value or monthly rental, by sections, and States: 1930.....	269
31. Rented nonfarm homes of Negro families by monthly rental, with median rentals, by sections, divisions, and States: 1930.....	270
32. Negro families classified by number of children under 10 years old, by sections, divisions, and States: 1930.....	271
33. Negro families classified according to the number of gainful workers, by sections, divisions, and States: 1930.....	272
34. Negro families by size, by sections, divisions, and States: 1930.....	273
35. Families classified by sex, age, color, and nativity of head, by tenure, for the United States: 1930.....	274
36. Number of Negro families for cities of 100,000 or more inhabitants: 1930 and 1920.....	275
37. Median size of Negro families, by tenure, for cities of 100,000 or more inhabitants: 1930.....	276
38. Homes of Negro families by tenure, for cities having 10,000 or more Negro inhabitants: 1930.....	277
39. Population, number of owned homes, and number of persons per home, by color, for cities and other urban places having 10,000 or more inhabitants: 1930.....	278
40. Owned nonfarm homes of Negro families by value, with median value, for cities of 100,000 or more inhabitants: 1930.....	280
41. Rented nonfarm homes of Negro families by monthly rental, with median rental, for cities of 100,000 or more inhabitants: 1930.....	281
42. Median value or rental of nonfarm homes owned or rented by Negro families, for cities having 10,000 or more Negro inhabitants: 1930.....	282
43. Percent distribution of nonfarm homes of Negro families, by value or monthly rental, for cities of 100,000 or more inhabitants: 1930.....	282
44. Negro families, by number of gainful workers, for cities of 100,000 or more inhabitants: 1930.....	284
45. Number and percent of Negro owner and tenant families having one or more lodgers, for cities of 100,000 or more inhabitants: 1930.....	285

	Page		Page
46. Negro families having radio set, for cities of 100,000 or more inhabitants: 1930.....	286	21. Number and proportion of Negroes 10 years old and over gainfully occupied, by sex, and marital condition of females 15 years old and over, for cities of 100,000 or more inhabitants: 1930.....	301
Chapter XIV.—OCCUPATIONS		22. Number of Negroes 10 years old and over gainfully occupied, for cities having 25,000 to 100,000 inhabitants: 1930.....	302
The classification by occupation.....	287	23. Negro males and females 10 years old and over gainfully occupied, by States: 1930.....	303
Number of Negroes gainfully employed.....	287	24. Negro gainful workers 10 years old and over, by occupation, age, and sex, for the United States: 1930.....	310
Number of Negroes gainfully occupied by sections.....	287	25. Gainfully occupied Negro women 15 years old and over, by occupations and marital condition, with a distribution of the single and unknown and of the married by age, for the United States: 1930.....	328
Proportion of the gainfully occupied Negroes in the various occupation groups.....	287	26. Negro gainful workers 10 years old and over, by sex, and age, by sections, divisions, and States: 1930.....	335
Negroes gainfully occupied by occupation groups by sections.....	287	27. Negroes 10 years old and over in each industry or service group, by occupation, and sex, for the United States: 1930.....	337
Distribution of Negro gainful workers in the various occupation groups by sex.....	287	Chapter XV.—VITAL STATISTICS, BIRTHS AN INFANT MORTALITY	
Distribution by occupation groups per 1,000 Negroes gainfully occupied.....	287	The registration area and classification of births.....	361
Occupations in which Negroes predominate.....	287	Ratio of births to deaths.....	361
Negro inhabitants per professional person.....	287	Births by age of mother.....	361
Age of Negro gainful workers in 1930.....	287	Percent of children living to those ever born.....	361
Number of Negro children 10 to 15 years old gainfully employed.....	288	Average number of children ever born to Negro women.....	361
TABLES		Illegitimate births.....	361
1. Number and proportion of persons 10 years old and over gainfully occupied, by color, nativity, and sex, for the United States: 1930, 1920, and 1910.....	288	Birth rates in cities and rural districts.....	361
2. Number and proportion of persons gainfully occupied, by sex, for the United States: 1900 to 1930.....	288	Births per 100 deaths in cities having 25,000 or more Negro inhabitants.....	361
3. Number and proportion of Negroes gainfully occupied, by sex, for the United States: 1910 to 1930.....	288	Stillbirths.....	362
4. Number and proportion of persons 10 years old and over gainfully occupied, by color, nativity, and sex, by sections: 1930 and 1920.....	289	Infant mortality.....	362
5. Gainful workers 10 years old and over, by general divisions of occupations, by color, and nativity, per 1,000 population, for the United States: 1930.....	289	Deaths under 1 year of age by cause.....	362
6. Gainful workers 10 years old and over, by occupations in which Negroes predominated, in the United States: 1930.....	289	MAP	
7. Gainful workers 10 years old and over, by color, nativity, and general divisions of occupations, for the United States: 1930, 1920, and 1910.....	290	Growth of the registration area for births: 1915 to 1930.....	360
8. Gainful workers 10 years old and over, by color, nativity, sex, and general divisions of occupations, for the United States: 1930.....	290	TABLES	
9. Number and percent distribution of gainful workers 10 years old and over, by color and nativity, by sections: 1930.....	291	1. Negro births and deaths (exclusive of stillbirths) in registration area: 1930 and 1920.....	362
10. Occupational gains and losses made by Negroes in the manufacturing and mechanical industries, for the United States: 1920 to 1930.....	292	2. Total number of Negro births (exclusive of stillbirths), by sex, and legitimacy in registration area in continental United States: 1931 and 1930.....	363
11. Average number of Negroes to each Negro reported in the principal professional occupations, by divisions, and States: 1930.....	292	3. Percent of children living to those ever born in registration area, by color, and nativity of mother: 1927 to 1931.....	364
12. Number of Negroes engaged in principal professions, by sections, divisions, and States: 1930.....	293	4. Average number of children ever born to women who bore children in 1931 and 1930, by age, and color of mother, in the registration area in continental United States.....	364
13. Negroes in proprietary, official, managerial, and supervisory pursuits (including foremen and overseers) in each industry or service group by sex, for the United States: 1930.....	294	5. Number of illegitimate births (exclusive of stillbirths) in the registration area of continental United States, with ratios to 1,000 total births, by age, color, and nativity of mother: 1931 and 1930.....	364
14. Number of gainfully occupied Negro women 15 years old and over, by marital condition, with a distribution of the single and unknown and of the married by age, by sections, divisions, and States: 1930.....	297	6. Percent distribution of illegitimate births by age, color, and nativity of mother, in the registration area of continental United States: 1931 and 1930.....	364
15. Number and proportion of women 15 years old and over gainfully occupied, by color, nativity, and marital condition, for the United States: 1930.....	297	7. Ratio of Negro illegitimate births to 1,000 total Negro births, by sex, in registration area in continental United States: 1931 and 1930.....	365
16. Percent of Negro women 15 years old and over gainfully occupied, by marital condition, for cities of 100,000 or more inhabitants: 1930.....	298	8. Number of colored and white births (exclusive of stillbirths) per 100 deaths in the birth registration cities having 25,000 or more Negro inhabitants: 1931 and 1930.....	365
17. Percent of Negro children 10 to 15 years old, gainfully occupied, by sex, for cities of 100,000 or more inhabitants: 1930.....	298	9. Deaths (exclusive of stillbirths) for certain subdivisions of the first year of life, by sex, and color, in the birth registration area in continental United States: 1931 and 1930.....	366
18. Percent of Negro women 15 years old and over, gainfully occupied, by marital condition, by sections, divisions, and States: 1930.....	299	10. Negro mothers of children born in 1930 having specified number of children ever born, with the average number living and the percent of mothers having specified number living, in the registration area in continental United States: 1930.....	366
19. Number and proportion of Negro children 10 to 15 years old gainfully occupied, by sex, for sections, divisions, and States: 1930.....	299	11. Infant mortality rate (deaths under 1 year of age per 1,000 live births) in the birth registration area in continental United States: 1931 and 1930.....	367
20. Number of Negroes 10 years old and over gainfully occupied, 1930, with percent gainfully occupied, 1930, 1920, and 1910, by sex, by sections, divisions, and States.....	300	12. Deaths under 1 year of age (exclusive of stillbirths) from important causes, by color, in the birth registration area in continental United States: 1931 and 1930.....	367

Page

13. Infant mortality rate (deaths under 1 year of age per 1,000 live births) from important causes, in the birth registration area in continental United States: 1931 and 1930.....	368
14. Negro births (exclusive of stillbirths), by sex, in registration cities, incorporated places, and rural districts: 1931 and 1930.....	368
15. Negro stillbirths, by sex, in registration cities, incorporated places, and rural districts: 1931 and 1930.....	370
16. Comparison of birth and death rates for colored and white population in selected registration States: 1927 to 1931.....	372
17. Infant mortality rates (deaths under 1 year of age per 1,000 live births), for colored and white, in selected registration States and cities: 1926 to 1931.....	374
18. Colored and white population, births and deaths, infant mortality, and stillbirths, in selected registration States, cities, and counties: 1931 and 1930.....	376
19. Colored births (exclusive of stillbirths), by sex, and by age of mother, in selected registration States: 1930.....	425
20. Colored births (exclusive of stillbirths), with the number of child in order of birth, in selected registration States: 1931 and 1930.....	426
21. Cases of colored plural births in selected registration States: 1931, 1930, and 1929.....	427
22. Number of colored plural births and plural stillbirths in selected registration States: 1931 and 1930.....	429
23. Colored deaths (exclusive of stillbirths) from important causes, by certain subdivisions of the first year of life, for selected States and cities: 1931 and 1930.....	430

Chapter XVI. - VITAL STATISTICS - MORTALITY

The registration area and classification of deaths.....	443
Cities, incorporated places, and rural areas.....	443
Deaths in 1920, 1930, and 1931.....	443
Death rates.....	443
Deaths by age and sex.....	443
Death rates in cities, incorporated places, and rural districts in 1930.....	443
Colored death rates in cities having 25,000 or more Negro inhabitants.....	445
Negro deaths from important causes.....	445

MAP

Growth of the registration area for deaths: 1880 to 1931.....	444
---	-----

TABLES

1. Deaths (exclusive of stillbirths) of Negro, by age and sex, and white by age, 1930; and of Negro and white, by age, 1920, in the registration area of continental United States.....	445
2. Negro and white death rates from all causes (exclusive of stillbirths) per 1,000 population: 1931, 1930, and 1920.....	445
3. Growth of registration area in continental United States: 1880 to 1931.....	446
4. Deaths (exclusive of stillbirths), by color, nativity, and sex, in the registration area of continental United States: 1930.....	446
5. Deaths of Negroes (exclusive of stillbirths) in the registration area of continental United States: 1931, 1930, and 1920.....	446
6. Population, deaths (exclusive of stillbirths), and death rates of Negroes in registration area of continental United States, cities, incorporated places, and rural districts, and in cities of nonregistration States: 1930.....	447
7. Deaths of colored persons (exclusive of stillbirths), in cities and rural districts of registration States, by race: 1930.....	448
8. Negro population of the registration area, and of the nonregistration area, and percentage in the area, by sections, divisions, and States: 1930, 1920, and 1910.....	449
9. Deaths (exclusive of stillbirths), by age, sex, color, and nativity of white: 1931.....	450
10. Negro and white deaths (exclusive of stillbirths), by age, and sex, in the registration area in continental United States: 1931, 1930, and 1929.....	451
11. Colored and white death rate (exclusive of stillbirths) from all causes, for selected cities: 1931, 1930, and 1920.....	452

Page

12. Total colored and white deaths (exclusive of stillbirths), deaths of residents, and death rates, in cities having 25,000 or more Negro inhabitants: 1930.....	453
13. Colored and white death rate from diseases of the heart, in selected States and cities: 1931, 1930, and 1920.....	453
14. Colored and white death rate from tuberculosis of the respiratory system, in selected States, and cities: 1931, 1930, and 1920.....	454
15. Colored and white death rate from pneumonia (all forms) in selected States and cities: 1931, 1930, and 1920.....	455
16. Colored and white death rate from nephritis, in selected States and cities: 1931, 1930, and 1920.....	456
17. Colored and white death rate from puerperal causes per 1,000 live births, in selected States and cities: 1931, 1930, and 1920.....	457
18. Deaths from homicide, by color, in cities having 25,000 or more Negro inhabitants: 1930.....	457
19. Colored and white death rate from homicide, in selected States, and cities: 1931, 1930, and 1920.....	458
20. Colored and white deaths (exclusive of stillbirths) from all causes and from unknown or ill-defined diseases, in registration area of continental United States, and selected registration States: 1930.....	458
21. Colored and white deaths from homicide, for registration area in continental United States, 1931, 1930, and 1929, and legal executions, 1931 and 1930.....	459
22. Colored and white deaths (exclusive of stillbirths) from all causes and from unknown or ill-defined diseases, in selected registration cities reporting 500 or more colored deaths in 1930.....	459
23. Total colored deaths, deaths of residents, and death rate in each registration city and county in selected States: 1930.....	460
24. Negro deaths (exclusive of stillbirths) from each cause, by sex, in registration States (including District of Columbia): 1931.....	464
25. Negro deaths (exclusive of stillbirths) from each cause, by sex, in registration States (including District of Columbia): 1930.....	466
26. Colored deaths (exclusive of stillbirths) from important causes, in registration area in continental United States, selected States (cities, incorporated places, and rural districts), and selected cities: 1930.....	468
27. Colored deaths (exclusive of stillbirths), by age, in the registration area of continental United States, selected registration States, cities, incorporated places, and rural districts: 1930.....	476
28. Colored deaths (exclusive of stillbirths) from important causes, by months, in selected States: 1930.....	479
29. Colored deaths (exclusive of stillbirths) from important causes, by age, in the 15 cities having 50,000 or more Negro inhabitants: 1930.....	484
30. Colored deaths (exclusive of stillbirths) from important causes, by months, in cities having 50,000 or more Negro inhabitants: 1930.....	489

Chapter XVII.—RETAIL BUSINESS

Negro proprietorship in retail business.....	494
Scope of the retail census.....	494
How stores are classified.....	494
Analyzing a \$12,000 store.....	494
Why very small stores can survive.....	494

CHARTS

Sales of each group of stores.....	495
Negro proprietorship—Sales of each group of stores.....	496

TABLES

1. Retail business, by specified racial classes, for the United States: 1929.....	497
2. Stores operated by Negro proprietors, for the United States, by sections and divisions: 1929.....	497
3. Net sales of stores operated by Negro proprietors, for the United States, by sections, and divisions: 1929.....	498
4. Pay roll and wage cost (percent of total sales) in retail stores operated by Negro proprietors, for the United States, by sections, and divisions: 1929.....	498
5. Stores operated by Negro proprietors, by States: 1929.....	498

	Page
6. Pay roll and wage cost (percent of total sales) in retail stores operated by Negro proprietors, by kind of business, for the United States: 1929.....	498
7. Kind of retail business reporting net sales of \$1,000,000 and over, operated by Negro proprietors in the United States: 1929.....	499
8. Stores operated by Negro proprietors, by kind of business, for the United States: 1929.....	499
9. Stores operated by Negro proprietors, by sections, divisions, and States: 1929.....	500
10. Kind of retail business operated by Negro proprietors, for States reporting net sales of \$500,000 and over: 1929.....	501
11. Stores operated by Negro proprietors by States: 1929.....	502
12. Stores operated by Negro proprietors, by kind of business, for cities having 50,000 or more Negro inhabitants: 1929.....	517
13. Stores operated by Negro proprietors for cities having 50,000 or more Negro inhabitants: 1929.....	518
14. Net sales of selected kind of business compared, by cities of 50,000 or more Negro inhabitants: 1929.....	518
15. Kind of retail business operated by Negro proprietors, reporting net sales of \$100,000 and over in cities having 50,000 or more Negro inhabitants: 1929.....	519
16. Stores operated by Negro proprietors in cities having 50,000 or more Negro inhabitants: 1929.....	519
17. Stores operated by Negro proprietors, by kind of business, for cities having 50,000 or more Negro inhabitants: 1929.....	520

APPENDIX

Characteristics of Negro population by counties: 1930----	683
---	-----

NEGROES IN THE UNITED STATES 1920-32

INTRODUCTION

Source and scope of the data.—Statistics relating to The Negro race covering a period of 125 years from 1790—the date of the first United States census—to 1915, were published in volume form by the Bureau of the Census in 1918, and this supplementary report for the years 1920 to 1932 is designed to bring up to date the previous publication through the inclusion of additional data compiled by the Bureau of the Census since 1915, thus completing a statistical record of available data covering 142 years. The 1790 to 1915 volume was largely historical in character in that it embraced two important periods in the status of the American Negro—from 1790 to 1860, slavery—from 1870 to 1915, freedom. This report, however, differs from the previous one in that it is purely a factual presentation of available census data covering the years 1920 to 1932, and is simply another entry in the record of the activities and progress of the Negro population in continental United States. The statistics presented are for the United States as a whole, for the three main sections of the country (the South, the North, and the West), for the several States and the District of Columbia, for nine groups of States designated “geographic divisions”, and for urban and rural areas. In some of the chapters, statistics are presented for counties and cities in which the Negro population constitute an important part of the total population.

Specifically, this volume presents statistics relative to the Negro race—growth by decades; geographical distribution in 1930 and changes in this distribution during the previous 10 years; movement to the North and to the cities; sex and age composition; marital condition; annual mortality and births in the registration area; school attendance and illiteracy; criminality insofar as this can be measured by the number of persons committed to State and Federal prisons and reformatories; number gainfully occupied; distribution according to occupation groups; ownership and value of homes; religious bodies and Sunday schools; retail business as conducted by Negro proprietors; farms, farm operators, and agricultural production.

The need for a special report arises from the fact that the census statistics relating to the subject must otherwise be sought for in many different volumes covering population, agriculture, occupation, mortality, retail business, and other general subjects. These statistics are not easily accessible to the public until they are brought together in a single publication. Much of the explanatory text of this volume is necessarily taken from the various general reports of the Bureau.

Part of the statistics presented in this chapter have been compiled from published tables of the Bureau of the Census, although in many tables the material has been reorganized from that previously published. This volume also presents much material which has never been published before by the Census Bureau.

Statistics on the Negro population have tended to become more comprehensive and detailed, not only as to the diversity of topics covered by schedule inquiries, but also in regard to tabulation made.

For the most part, the latest statistics presented here are for 1930. These data were secured in the censuses of agriculture, and population, taken as of April 1, 1930. For religious bodies, the latest available census data were for 1926. Many statistics on Negro births are presented here for the first time. Data on births, mortality, and persons in State and Federal prisons and reformatories are presented for 1931, since these data are compiled annually by the Bureau of the Census. Statistics on retail business as conducted by Negro proprietors were secured by a canvass in 1930 and reports were for the business of the year 1929.

Color and race.—In the main, tabulations of the population by color or race, three groups are distinguished, namely, Negroes, whites, and “other races.” In some of the tables, the third group has been subdivided into its constituent parts such as Indian, Chinese, Japanese, Hindu, etc. In several of the tables, data are presented for the total population and for Negroes, and whites, omitting the relatively small numbers of “other races.” The figures for “other races”, however, are included in the totals and can be obtained, if needed, by adding the figures for Negro and white and subtracting the sum from the total. In other tables, only two classes of population are shown, namely, colored and white, because in carrying out the tabulation scheme, the figures were compiled in this manner. In such cases, “colored” includes Negro, Indian, Chinese, Japanese, etc.

Urban and rural areas.—Throughout many of the chapters in this volume, statistics are presented for the population classified as urban or rural. Urban population, as defined by the Bureau of the Census is, in general, that residing in cities or other incorporated places having 2,500 inhabitants or more, the remainder being classified as rural. In three States, New Hampshire, Massachusetts, and Rhode Island, conditions are exceptional in that the compactly built portions of the towns (townships) are not separately incorporated or politically distinct in any way from the rural territory within the same town; nor is it the usual practice to incorporate even the larger places as cities until they attain a population in excess of 10,000. Consequently, if only cities were counted as urban, the classification would be inadequate. In 1920 and 1910 all towns in these three States which had a population of 2,500 or more were classified as urban. This resulted in the inclusion of a considerable number of places that were mainly rural in their general characteristics. In 1930, the special rule for these three States was modified so as to place in the urban classification, in addition to the regularly incorporated cities, only those towns in which there was a village or

thickly settled area having more than 2,500 inhabitants and comprising either by itself or when combined with other villages in the same town, more than 50 percent of the total population of the towns.

In 1930 another modification extended the classification or urban to include townships or other political subdivisions (not incorporated as municipalities, nor containing any area so incorporated) which had a total population of 10,000 or more and a population density of 1,000 or more per square mile. In the tables in this volume, the figures for 1910 and 1920 are presented as these statistics were then published, hence the data for these 2 years are not exactly comparable with those for 1930 for urban and rural areas.

Rural-farm and rural-nonfarm areas.—Rural population is subdivided into two classes, rural-farm and rural-nonfarm. The classification of the population as to rural-farm and rural-nonfarm is based on the reply to the question in the population schedule, reading: "Does this family live on a farm?" Those persons living on farms were classified as rural-farm and those living outside cities or other incorporated places having 2,500 inhabitants or more, who did not live on farms, as rural-nonfarm.

Fewer 75 percent Negro counties.—In 1930 there were 19 counties in which Negroes constituted 75 percent or more of the total population. Mississippi reported 8 of these counties; Alabama, 6, Georgia 2; and Arkansas, Louisiana, and Virginia, 1 each. At the Census of 1920 there were 36, and at the Census of 1910 there were 53 counties in which the Negro population formed 75 percent or more of the total county population. In 1930, Tunica County, Miss., reported 6,103 and Lowndes County, Ala., 6,048 Negroes per 1,000 whites. Negroes constituted 85.8 percent of the total population of each county.

School attendance.—For the United States as a whole, 60 percent of the Negro population 5 to 20 years of age attended school in 1930, as compared with 53.5 percent in 1920, 44.7 percent in 1910, and only 9.2 percent in 1870. Of the 15 cities having 50,000 or more Negro inhabitants, Cleveland, Ohio, reported the highest percentage of Negro children 7 to 15 years of age attending school. Chicago occupied second rank in this respect, and was followed in the order named by New York, Washington, Philadelphia, Pittsburgh, St. Louis, Houston, Baltimore, Memphis, Birmingham, Richmond, Detroit, New Orleans, and Atlanta. The percent attending school ranged from 97 in Cleveland to 86.6 in Atlanta.

Agriculture.—The farming activities of the Negro are generally listed as an asset to the agricultural resources and wealth of the Nation. Of the 13,853,599 bales of cotton produced in the Southern States in 1929, colored farmers produced 4,492,807, or 32.4 percent of the total. Colored farm owners produced 533,141 bales valued at \$45,408,734. The value of farm products sold, traded, or used by the families of colored farm owners in the South amounted to \$119,415,311.

Negroes engaged in principal professions.—In the total Negro population of 11,891,143 reported at the Census of 1930, there were 54,439 school teachers; 25,034 clergymen; 10,583 musicians and teachers of music; 5,728 trained nurses; 3,805 physicians and surgeons; 2,146 college presidents and professors; 1,746 dentists; and 1,230 lawyers, judges, and justices. Nearly 40 percent (39.3) of the physicians and surgeons were located in 7 northern States (New Jersey,

New York, Pennsylvania, Ohio, Michigan, Illinois, and Missouri) and the District of Columbia, having a combined population of less than 19 percent of the total Negro population of the United States.

Negro home ownership.—During the 10 years, 1920 to 1930, there was an increase of 126,991 owned homes occupied by Negro families in the United States. The South reported an increase of 15.6 percent; the North, 67.4 percent; and the West an increase of 89.3 percent. Michigan led all other States with an increase of 183.1 percent, followed in the order named by Arizona, California, New York, District of Columbia, and New Jersey. Of the 15 cities having a Negro population of 50,000 or more, Philadelphia led with the greatest number of homes owned.

Decline of Negro illiteracy.—Of the 9,292,556 Negroes 10 years of age and over, 1,513,892 or 16.3 percent were reported illiterate, as compared with 2,789,689 or 81.4 percent in 1870, 60 years previous. South Carolina reported the highest percentage of Negro illiteracy for the United States in 1930, having displaced Louisiana where the highest percentage had been reported at each census since 1890. Alabama and Louisiana occupied second and third places, respectively, in 1930.

Marital condition in principal cities.—Of the 53 cities having 15,000 or more Negro inhabitants at the Census of 1930, Kansas City, Kans., reported the highest percentage of married males, Tulsa, Okla., widowed, and Beaumont, Tex., divorced males. For females, Gary, Ind., occupied first rank in the percentage married; Augusta, Ga., with widowed and Beaumont, Tex., with the highest percentage of divorced.

Infant mortality.—The highest colored infant mortality rate in 1931 for the seven cities with 100,000 or more Negro population was reported for Washington, D. C., with 115.2 deaths under 1 year per 1,000 live births. Baltimore, New York, New Orleans, Philadelphia, Detroit, and Chicago followed, in the order named.

Death rates from all causes.—For the seven cities having 100,000 or more Negro inhabitants as reported at the last census, the colored death rates from all causes per 1,000 estimated population (July 1, 1931), were as follows: New Orleans, 23.5; Washington, 22; Baltimore, 19.9; New York, 16.2; Philadelphia, 15.9; Chicago, 15.3; and Detroit, 13.2. Slightly higher rates were reported in 1931 than for 1930 for Baltimore and Washington while the New York rate remained unchanged. Decreased rates were reported for Chicago, Detroit, New Orleans, and Philadelphia.

Retail stores operated by Negro proprietors.—Of the 25,701 stores, 18,864 or 73.4 percent were in the South, 6,475, or 25.2 percent in the North, and 362, or 1.4 percent in the West, and of the \$101,146,043 reported value of sales, the South with 78.7 percent of the total Negro population reported \$57,036,307, or 56.4 percent of the total sales, the North with 20.3 percent of the Negro population reported \$40,335,397, or 39.9 percent of the sales, and the West with 1 percent of the Negro population reported \$3,774,339, or 3.7 percent of the total sales. Among the States, Texas reported the highest value of sales, \$6,633,701, followed by Pennsylvania with sales amounting to \$6,519,865; Illinois, \$6,466,323; North Carolina, \$5,770,830; New York, \$5,625,743, and Georgia, \$5,147,040. No other State reported sales valued at \$5,000,000 or more. The Negro population of these six leading States, as reported at the Census of 1930, was 4,017,779, or 33.8 percent of the total Negro population of the United States.

CHAPTER I.—NEGRO POPULATION AND GROWTH IN THE UNITED STATES

Summarization of chapter.—In the 140 years from 1790 to 1930 the Negro population increased from three-quarters of a million to nearly 12 millions. Approximately one-third of this increase has taken place since 1900. The increase in Negro population from 1920 to 1930 was greater than the total Negro population shown in the census of 1800.

In nearly every decade (with two exceptions, 1800–10 and 1870–80), the percentage of increase for the Negro race has been below that for the white race. The large percentage of increase in the number of Negroes in the decade from 1800–10 was due to the importation of Africans prior to 1808, after which year the slave trade was prohibited by law. The rate of increase in the decades 1860–70 and 1870–80 were materially affected by the under count of Negroes in the census of 1870. If an adjusted figure for 1870 had been used for Negroes, the percentage of increase shown in table 1 would have been lower for the Negro than for the white race. The increase shown for the Negro population in the decade 1920–30 is equivalent to a constant annual increase of 1.28 percent, as compared with 0.63 percent for the decade 1910–20 and 1.07 percent for the decade 1900–10.

Usually the rate of increase for the Negro race has been very much lower than that of the white race. Immigration, which since the early part of the nineteenth century has been an important contributing factor in the growth of the white population, has contributed very little to the growth of the Negro population. Since 1810 the growth of the Negro population has been almost entirely due to natural increase by excess of births over deaths.

The rapid downward trend in the decennial rate of increase in Negro population from 1880 to 1920 is largely due to the decline in the birth rate. In the decade 1920–30 there appears a reversal of this down-

ward trend. Death and birth registration figures, showing that the Negro death rate declined more rapidly than the Negro birth rate, substantiate the upward trend for the last decade.

Fluctuations in the decennial rates of increase in the Negro population are difficult to explain. For example: The rate of increase dropped from 11.2 percent in the decade 1900–10 to 6.5 percent in the decade 1910–20, followed by a rate of 13.6 percent between 1920 and 1930. Similar fluctuations occurred between the decades 1870–80 and 1880–90. These fluctuations have been so considerable as to be in themselves improbable and have been contrary in direction in successive decades. In the face of these fluctuations the Bureau of the Census has admitted an under count of Negroes in 1870 and the possibility of an under-count in 1890 and 1920. However, it is not correct to assume that the fluctuations between the decades 1900–10 and 1910–20 were due entirely to an incomplete enumeration. The influenza epidemic in 1918–19, together with shifts in Negro population caused by labor conditions, military service in the World War, and the advent of the bollweevil into areas of relatively high density of Negro population, contributed to the decrease in the birth rate, on the one hand, and the noticeable increase in the death rate, on the other.

In table 4 an attempt has been made to present data which eliminate the influence of the deficient enumeration in 1870 and 1890. In this table the increase during each decade has been determined by taking the increase in Negro population in the area included in the preceding census and not the increase in the United States as a whole. Fluctuations in the percentage increase are markedly reduced in table 4, even in the earlier decades, as compared with those shown in table 1.

TABLE 1.—NEGRO, WHITE, AND OTHER POPULATION OF THE UNITED STATES, WITH DECENNIAL INCREASE: 1790 TO 1930

[For a revision of figures in accordance with estimates of the Negro population for 1870 and 1890, and with reference to extensions of the area of census enumeration, see table 4]

1790	757, 208						19. 3	239

¹ Includes slaves only for western Georgia.

CHAPTER II.—GEOGRAPHIC DISTRIBUTION AND INCREASE

Negro distribution by sections and divisions.—The largest proportion of the Negro population resides in the South. Of the total Negro population in 1930, 78.7 percent was in the Southern States. Over 37 percent of the total was in the South Atlantic States alone. Approximately one-fifth of the total was in the North, and only 1 percent was in the West.

The greatest change in the distribution of the Negro race within the United States since 1790 occurred in the decade 1920–30. During the last decade there has been a marked shift northward. Previous to 1919 the proportion of the Negro population resident in the South did not vary greatly from census to census. In 1790, the proportion living in the South was 91.1 percent and this proportion increased in succeeding decades to a maximum proportion of 92.8 percent in 1830. It fell off in 1870, and declined slightly, from census to census, to 89 percent in 1910. It dropped from 89 percent to 85.2 percent from 1910 to 1920 and to 78.7 percent in 1930.

In the 140 years since 1790 the principal direction of migration has been westward and a large part of the growth of the Negro population within the South has taken place in the East South Central and West South Central divisions. In 1790, of the total Negro population, 88.9 percent was in the South Atlantic States. In 1930, only 37.2 percent of the total Negro population was resident in these States. The general westward migration brought an increase in the percentage living in the East South Central States from 2.2 percent in 1790 to 31.4 percent in 1860. This percentage has decreased at each census since 1860 to 22.4 percent in 1930. ➡

Growth of Negro population and distribution of increase by divisions and sections.—Between 1920 and 1930 the Negro population increased over 1,400,000 as compared with about 600,000 for the period 1910–20. The growth of the Negro population during the 20

years, 1910–30, was less than during the period 1890–1910, or the period 1870–90.

More than two-thirds of the increase in the Negro population during the last two decades has taken place in the North. Between 1790 and 1830, and between 1870 and 1910, most of the growth of the Negro population occurred in the South Atlantic States. From 1830 to 1850 the largest part of the increase occurred in the East South Central States and from 1850 to 1870, in the West South Central States.

Negro distribution by States.—Over 40 percent of the Negro population in 1930 was in the 5 States having the largest number of Negroes: Georgia, Mississippi, Alabama, North Carolina, and Texas. These 5 States, together with 6 other Southern States, South Carolina, Louisiana, Virginia, Arkansas, Tennessee, and Florida, had 70.7 percent of the total Negro population in 1930. Two States, Georgia and Mississippi, each had more than a million Negroes in 1930, and 6 States, New Hampshire, Idaho, South Dakota, Vermont, Nevada, and North Dakota, had less than 1,000 each. Pennsylvania, New York, and Illinois had the largest number of Negroes of any of the Northern States. Between 1920 and 1930 the Negro population increased in 32 States and the District of Columbia and decreased in 16 States.

Negro population per square mile in 1930.—There were 4 Negroes per square mile in the United States in 1930 as compared with 41.3 persons for all the population and 36.6 for all whites. The Negroes numbered 10.7 per square mile in the South, 2.6 in the North, and only about 0.1 in the West. In the rural South there were 7.3 Negroes per square mile, whereas, in the rural areas of the North and West there was less than one Negro per square mile. In the North, the Negro population was almost completely urban, whereas most of the Negroes in the South lived in rural areas.

NEGROES IN THE UNITED STATES

1 Dakota Territory.

CHAPTER III.—PROPORTION IN TOTAL POPULATION

Decrease in proportion of Negroes.—The proportion of Negroes in the total population has materially declined in the 140 years that have elapsed since the first census was taken in 1790, when almost one-fifth (19.3 percent) of the 3,929,214 persons were Negroes. In 1930, Negroes constituted only 9.7 percent of the total population. More than 60 percent of the Negro population lived in the States in which the proportion of the Negro population exceeded 25 percent of the total population. In fact, the 9 States, Mississippi, South Carolina, Louisiana, Georgia, Alabama, Florida, North Carolina, Virginia, and Arkansas, and the District of Columbia had 60.6 percent of the total Negro population in 1930 and only 12.5 percent of the total white population. In only the District of Columbia and 18 States, including 2 Northern States, Missouri and New Jersey, did the Negro population constitute 5 percent or more of the total population.

The steady decrease in the Negro proportion since 1810 has been due to the increase of the white population through the immigration of foreign-born white and several generations of their offspring, an accession that lowered the proportion of Negroes, whose growth of population is largely the result of natural increase. From 239 Negroes per 1,000 whites in 1790, the ratio has decreased to 109 Negroes per 1,000 whites in 1930.

Between 1920 and 1930 the proportion of Negroes to 100,000 whites increased in the District of Columbia and 19 States—3 Southern and 16 Northern and Western, decreased in 28 States—13 Southern and 15 Northern and Western, and did not change in Minnesota. Considered by States, the proportion of Negroes

to whites in the South decreased generally in this decade, except in Maryland, Delaware, and West Virginia and the District of Columbia. Interstate migration has been an important factor in changing the proportion of Negroes to whites in several States.

Proportion of Negroes in the South.—The Negro population, though comprising less than 10 percent of the total population in the United States, comprises approximately one-fourth of the population of the South. More than one-half of the population of Mississippi was Negro in 1930. The percentage of Negroes was 45.6 for South Carolina, 36.9 for Louisiana, 36.8 for Georgia, and 35.7 for Alabama. All other States show less than one-third of the total population as being Negro. The percentage of Negroes in the population of the South has declined materially within the last 50 years. In 1880 it was 36 percent of the total population of the South. This was about the same as it had been since the first census in 1790. This percentage fell off to 33.8 in 1890, 32.3 in 1900, 29.8 in 1910, 26.9 in 1920, and 24.7 in 1930.

Proportion of Negroes in the North.—There has been a gradual increase in the percentage of Negro population in the North since 1860. A large part of this increase occurred in the decade 1920-30. However, even in 1930 the percentage of Negroes in the total population in the North was only 3.3. But this slight increase in the percentage reflects a very considerable increase in the number of Negroes in the North. It reflects also the striking change in the territorial distribution of the Negro population.

¹ Figures for white population in 1920 and 1910 are adjusted by deducting the estimated number of Mexicans.² Dakota Territory.³ Includes Indian Territory in 1900 and 1890.

CHAPTER IV.—NATIVITY

Explanation of terms used.—"Native population", as the term is used here, comprises all persons born in continental United States and in any of the outlying possessions, and persons of native parentage born abroad or at sea and designated, respectively, "American citizens born abroad" and "American citizens born at sea." The term, "native population", when used in headings for tables which present statistics by States, does not indicate that these persons are native of specific States, but merely that they were born in the United States. Natives of individual States are designated in table headings as "population born in" specified States.

For a number of persons, the enumerators reported the place of birth as the United States without specifying the State. Persons for whom the place of birth was not specifically reported, and for whom the returns give no indication of foreign origin, have also been assumed to be natives of the United States, and included in the groups designated "United States, State not reported."

In measuring the movement of the population between sections, or States, the term "net gain or loss" is used. An example will indicate the method used in obtaining the net gain. For the North the net gain is obtained by subtracting the number of Negroes born in the North and living in the South from the number born in the South and living in the North.

It should be understood that the figures given in this chapter do not represent or measure the gross migration of the Negroes. The figures presented herein do not show the extent of interstate migration, but the net cumulative results of such migration in combination with mortality.

Native and foreign-born Negro population.—Less than 1 percent, or only 98,620, of the Negroes in the United States are of foreign birth, according to the census of 1930. However, the number of foreign-born Negroes in the United States in 1930 is almost five times as large as in 1900.

A very large percentage of the foreign-born Negro population in the United States in 1930 was born in the Western Hemisphere; mostly in the West Indies, in Canada, and the islands off the Atlantic Coast.

Year of immigration to the United States.—Over 40 percent of the total foreign-born Negro population immigrated to the United States between 1920 and 1930. The largest number of these immigrants arrived between 1920 and 1930. The number of male immigrants was approximately 20 percent greater than the number of female.

Place of residence of foreign-born Negro population.—Approximately six-tenths of the foreign-born Negro population resided in New York. Florida and

Massachusetts each had about one-tenth of the total foreign-born Negro population.

Native Negro population by division of birth and division of residence.—More than 90 percent of the Negroes residing in the South (South Atlantic, East South Central, and West South Central divisions), in 1930, were born there, while the North had less than 36 percent of its Negro population born in the division of their residence.

Gain or loss of native Negro population by divisions.—The results of the migration of the native Negro population indicate the movement of the Negroes to the North. In the interval of 10 years, 1920-30, the number of Negroes living in the North, but born in the South, increased from 737,423 to 1,355,789. During the 20-year period, 1910-30, interdivisional migration resulted in a considerable loss in the South Atlantic and East South Central divisions but a large gain in the Middle Atlantic and East North Central divisions.

Place of birth and residence, 1930.—More than 58 percent of the Negroes living in the North and the West were born in the South, while less than 1 percent of the Negro population in the South in 1930 was born in the other sections.

The decreasing percentage of the native-born Negroes living in the State of birth indicates the increasing migration of the Negro population. This percentage was 73.8 percent in 1930, as compared with 79.2 percent in 1920 and 82.7 percent in 1910.

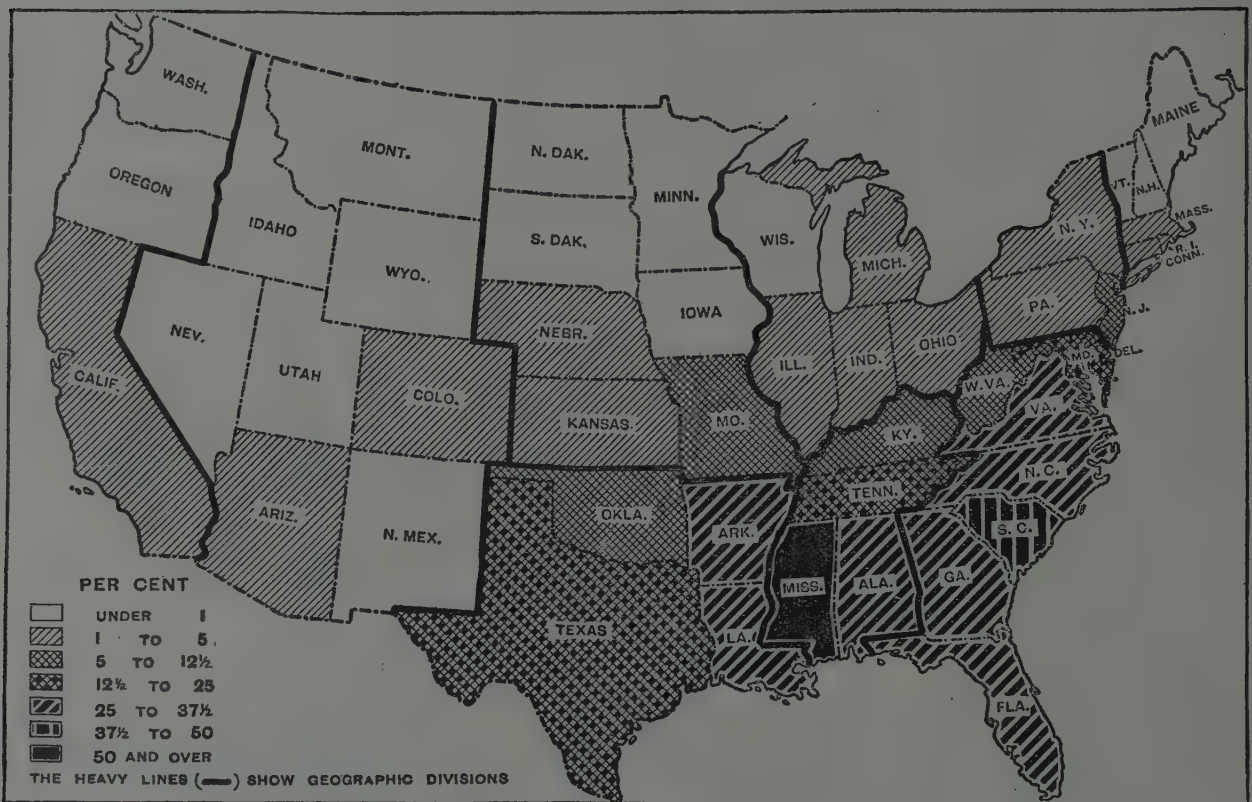

All of the Southern States, except Delaware, West Virginia, Florida, Arkansas, and Oklahoma, and the District of Columbia, showed a loss in Negro population in 1930 through interstate migration. There were gains as a result of interstate migration in all the Northern and Western States, except Maine, Vermont, and North Dakota.

The Negroes born in the northernmost of the Southern States have shown a tendency to move northward. For example, the largest number of the Negroes born in Maryland and living outside the State were living in Pennsylvania; the largest number born in North Carolina and living outside the State were living in Virginia; the largest number born in South Carolina and living outside the State were living in North Carolina.

The largest portion of the Negroes living in New England and the Middle Atlantic States, but born in other States, were born in Georgia, North Carolina, South Carolina, and Virginia. Most of the Negroes living in the East North Central States, but born in other States, were born in Alabama, Georgia, Kentucky, Mississippi, and Tennessee.

PERCENTAGE OF NEGROES IN THE TOTAL POPULATION, BY STATES: 1930

NEGROES IN THE UNITED STATES

TABLE 15.—NEGRO POPULATION DISTRIBUTED AS BORN IN STATE OF RESIDENCE, IN OTHER STATES, OR IN FOREIGN COUNTRIES, FOR CITIES OF 50,000 OR MORE HAVING AT LEAST 5,000 NEGROES, 1930, WITH PERCENTAGES FOR 1930, 1920, AND 1910

[Percentages for 1920 or for 1910 not shown if the population of the city was under 50,000 or the number of Negroes under 5,000. An asterisk (*) indicates that the percentage was less than one-tenth of 1 percent.]

CHAPTER V.—URBANIZATION

Definition of terms used.—Urban population, as the term is used here, is, in general, that residing in cities or other incorporated places having 2,500 or more inhabitants, the remainder being classified as rural. In 1930, in addition, the population of townships or other political subdivisions (not incorporated) which had a population of 10,000 or more, and a population density of 1,000 or more per square mile, was regarded as urban.

The rural population has been divided into two groups, rural-farm and rural-nonfarm population. This classification has been made on the basis of whether or not the family was living on a farm. The rural-nonfarm population includes in the main persons living in small towns, villages, etc., both incorporated and unincorporated. The rural-nonfarm population includes also a considerable number of families living in wholly rural areas, but not on farms.

Urban and rural Negro population.—The Negro population is, in the main, rural. But in 1930, of the total Negro population, only 56.3 percent was rural, as compared with 66 percent in 1920, and 72.7 percent in 1910. These data indicate the increasing movement of Negroes from the rural areas to the urban centers, and if the trend continues it is probable that by 1940, the Negro, like the white population, will be predominantly urban. In 1930 the Negro population constituted 12.4 percent of the rural population of the United States, as compared with 10.4 percent in 1920. The Negroes in urban population formed only 7.5 percent of the total in 1930, as compared with 6.6 percent in 1920.

The general trend of the Negro movement has been from rural areas and small urban centers to cities of 100,000 or more inhabitants. Between 1920 and 1930, the Negro population of urban territory increased from 3,559,473 to 5,193,913, while that of rural areas decreased from 6,903,658 to 6,697,230. The Negro population of cities, with 100,000 or more inhabitants, increased approximately 1,200,000 during that same period.

In both decades, 1920 to 1930, and 1910 to 1920, the urban Negro population increased at a greater rate than the white population. The percentage of increase for the Negroes for the period 1920 to 1930 was 45.9 and for 1910 to 1920 was 32.6, as compared with 24.1 and 28.5, respectively, for the white population.

Rural and urban Negro population by sections and divisions.—A large part of the Negro population in the North and West was urban, while that of the South was rural. In 1930, the Negro population was 88.3 percent

urban in the North and 82.5 percent in the West, as compared with 31.7 percent in the South.

There has been a steady increase from 1910 to 1930 in the percentage of the Negro urban population in the South Atlantic, the East South Central, and the West South Central divisions, in fact, in the South as a whole.

Although the total Negro population in the United States in 1930 was 43.7 percent urban, yet in only 15 States (1 in the North, 13 in the South, and 1 in the West) was the Negro population less than 50 percent urban, while the white population was 53 percent urban. There were 28 States (9 in the North, 13 in the South, and 6 in the West) with a white population that was less than 50 percent urban.

Urban, rural-farm, and rural-nonfarm Negro population.—In 1930, of the total Negro population in the United States, 39.4 percent was rural-farm, that is, living on farms or in incorporated places of less than 2,500 inhabitants and in territory outside of incorporated places. The Negroes in incorporated places of less than 2,500 inhabitants and in the territory outside of these places, but not living on farms, constituted 17 percent of the total Negro population in 1930.

In the South, the Negro population was approximately one-half rural-farm while in the North and West 2.7 and 5.1 percent, respectively, of the total Negro population was rural-farm. In the South 19.1 percent of the Negro population was rural-nonfarm in 1930.

Negro population in the largest cities.—There were 2,881,790 Negroes in the 93 cities having a total population of 100,000 or more in 1930. Seven cities, New York, Chicago, Philadelphia, Baltimore, Washington, New Orleans, and Detroit had more than 100,000 Negroes. Over one-third of the Negro population in the North was concentrated in the 4 northern cities having 100,000 or more Negroes. More than two-thirds of the Negro population in the North was in the cities with total population of 100,000 or more inhabitants. The Negro population represented more than 38 percent of the total in Birmingham and Memphis; over 33 percent in Atlanta, Jacksonville, and Norfolk; more than 25 percent in Washington, New Orleans, Richmond, Nashville, and Chattanooga; and more than 20 percent in Houston, Miami, and Tampa. In 1930, there were 80 cities in the United States with a Negro population of 10,000 or more.

In almost every southern city, the proportion of Negroes in the total population has been decreasing, while in the northern cities the proportion has been increasing.

URBANIZATION

¹ Includes "Other races."

² The rural farm population as shown for 1930 comprises all persons living on farms in rural areas, that is in incorporated places of less than 2,500 inhabitants, and in territory outside of incorporated places.

³ The rural-nonfarm population, sometimes termed the "village" population, includes, in general, all persons living outside cities or other incorporated places having 2,500 inhabitants or more who do not live on farms.

1 Data not available. Places were either unincorporated in 1920 or had less than 2,500 inhabitants.

2 Albany and Decatur cities and Fairview town consolidated as Decatur City in 1927; combined population in 1920, 12,404; Negro, 3,180.

3 Phenix city and Girard city consolidated as Phenix City in 1923; combined population in 1920, 10,374; Negro, 2,458.

4 Total population 1920 for Nogales corrected by inclusion of population (3,261) of Camp Stephen D. Little, erroneously returned as outside. Number of Negroes not available.

5 Combined population of Texarkana city, Miller County, Ark., and Texarkana city, Bowie County, Tex., 27,366; Negro, 8,043 in 1930, and 5,613 in 1920.

6 Data not available by color.

7 No Negro population.

8 Organized in 1921.

9 Daytona Beach, Daytona, and Seabreeze cities consolidated as Daytona Beach city in 1925. Negro population for Daytona 2,478, not available for Daytona Beach and Seabreeze.

10 Name changed from West Hammond in 1924.

11 Figures for Geneva city for 1920 corrected by inclusion of population (596) of State Training School for Girls erroneously enumerated as in Geneva township. Data not available for Negroes in this institution.

12 Combined population of Union city, Randolph County, Indiana, and Union city village, Darke County, Ohio, 4,389; Negro, 20 in 1930, and 64 in 1920.

13 Name changed from West Minneapolis in 1928.

14 Linden borough and Linden township consolidated as Linden city in 1925; combined Negro population for 1920 not available.

15 New Milford borough incorporated from Palisades township in 1922.

16 Palmyra township incorporated as a borough in 1923.

17 Union and Endicott villages consolidated as Endicott village in 1921; combined Negro population for 1920, 16.

18 Name changed from Watkins in 1926.

19 Name changed from East Youngstown in 1926.

20 Combined population of Union city village, Darke County, Ohio and Union city, Randolph County, Ind., 4,389; Negro, 20 in 1930, and 64 in 1920.

21 Aliquippa and Woodlawn boroughs consolidated as Aliquippa borough in 1928; combined Negro population in 1920, 978.

22 Beaver Falls and College Hill boroughs consolidated as Beaver Falls city in 1930; combined Negro population in 1920, 364.

23 Clairton, North Clairton, and Wilson boroughs consolidated as Clairton city in 1922; combined Negro population in 1920 not available for North Clairton and Wilson borough.

24 Dorranceton and Kingston boroughs consolidated as Kingston borough in 1922; combined Negro population in 1920, 10.

25 East Waynesburg and Waynesburg borough consolidated as Waynesburg borough in 1923; combined Negro population in 1920 not available for East Waynesburg, or Waynesburg borough.

26 Yorkville changed to York May 15, 1915.

27 Combined population of Bristol city, Sullivan County, Tenn., and Bristol city, Va., 20,845; Negro, 2,143 in 1930, and 2,001 in 1920.

28 Combined population of Texarkana city, Bowie County, Tex., and Texarkana city, Miller County, Ark., 26,366; Negro, 8,043 in 1930, and 5,613 in 1920.

29 Combined population of Bluefield town, Tazewell County, Va., and Bluefield city, Mercer County, W. Va., 23,245; Negro, 3,648 in 1930, and 3,131 in 1920.

30 Combined population of Bristol city Va., and Bristol city, Sullivan County, Tenn.: 20,845; Negro, 2,143 in 1930, and 2,001 in 1920.

31 Basic city and Waynesboro towns consolidated as Waynesboro town in 1923.

32 Combined population of Bluefield city, Mercer County, W. Va., and Bluefield town, Tazewell County, Va., 23,245; Negro, 3,648 in 1930, and 3,131 in 1920.

CHAPTER VI.—“THE BLACK BELT”

Diffusion of Negro population.—Some of the 11,891,143 Negro inhabitants of continental United States lived in every State and in 2,855, or 92.1 percent of all the counties, parishes, or other civil divisions of the States. Negroes inhabited the District of Columbia and every county in 18 States; all except 1 county in 7 States; all except 2 counties in Wyoming and Nevada; all except 3 in Arkansas and New Mexico; all except 4 in Oklahoma and Oregon; all except 6 in Indiana, Illinois, Kansas, and Washington, and all except 7 in Michigan, and 9 in Colorado.

Of the 2,855 counties or parishes having Negro inhabitants in 1930, there were 1,666 which had a total Negro population of less than 1,000. There were 1,189 counties, 967 in the South, 204 in the North, and 18 in the West, having a Negro population of 1,000 or more. There were 581 counties having 1,000 to 5,000 Negro inhabitants; 271 counties having 5,000 to 10,000; 266 counties having 10,000 to 25,000; 46 counties having 25,000 to 50,000; and 15 counties having a Negro population of 50,000 to 100,000. There were 10 counties, 6 in the South and 4 in the North, with a Negro population of 100,000 or more.

Area of relatively high proportion of Negroes.—The area made up of a number of counties in eastern Virginia and North Carolina; a belt of counties extending from the Atlantic coast through South Carolina, central Georgia, and Alabama; together with a portion of the lower Mississippi Valley, has a large proportion of Negroes in the total population and is generally known as the “Black Belt.” In these counties, the proportion of Negroes in the total population was 50 percent or more.

Decrease in the number of counties and population in the “Black Belt.”—In 1930 there were 191 counties

in which the population was 50 percent or more Negro as compared with 221 in 1920, and 264 in 1910. The Negro population of these 191 counties in 1930 was 2,738,432, or 29.3 percent of the total Negro population of the South, as compared with 3,251,440 in 1920, 3,932,484 in 1910, and 4,057,619 in 1900. Since 1900 the Negro population of the “Black Belt” has decreased 1,319,187, or 32.4 percent. However, part of this decrease has been due to a decrease of the area included in the “Black Belt.”

The total white population in the counties having 50 percent or more of Negro population was 1,595,564 in 1930, 1,815,245 in 1920, 2,094,964 in 1910, and 2,163,731 in 1900.

“Black Belt” counties, by States.—Georgia had 48 counties in 1930 in which the Negro population constituted 50 percent or more of the total; Mississippi, 35; South Carolina, 25; Virginia, 21; Alabama, 18; Louisiana, 16; Arkansas, 9; North Carolina, 9; Florida, 4; Texas, 4; and Tennessee, 2. There were no counties having 50 percent or more Negro population in 5 Southern States, Delaware, Maryland, West Virginia, Kentucky, and Oklahoma.

Southern counties by proportion of population Negro: 1930.—In 1930, of the 1,415 counties in the South, 604, or 42.7 percent, had a Negro population which constituted less than 12.5 percent of the total population. The Negro population constituted between 12.5 and 24.9 percent of the total population in 227 counties; between 25 and 49.9 percent in 393 counties; between 50 and 74.9 percent in 172 counties; and 75 percent or more in 19 counties. The counties having 75 percent or more Negroes were distributed as follows: Mississippi, 8; Alabama, 6; Georgia, 2; and 1 each in Virginia, Arkansas, and Louisiana.

TABLE 1.—NUMBER OF COUNTIES REPORTING NEGRO INHABITANTS, 1930, BY SECTIONS, DIVISIONS, AND STATES

DIVISION AND STATE	Total number of counties	COUNTIES REPORTING		DIVISION AND STATE	Total number of counties	COUNTIES REPORTING	
		Negro inhabitants	No Negro inhabitants			Negro inhabitants	No Negro inhabitants

1 Organized from parts of Houston and Macon Counties in 1925.

CHAPTER VII.—SEX DISTRIBUTION

Ratios of Negro males to females.—An excess of females over males in the Negro population of the United States has appeared persistently in the census returns for the last 100 years. In 1930 there were 179,805 more females than males in the Negro population of the United States while there were 1,463,501 more males than females in the white population. The sex ratio, or the number of males per 100 females, for the Negro population in the United States was 97 in 1930 as compared with 102.7 for the white population. During the last 10 censuses the sex ratio for the Negro population has varied from 96.2 to 99.6.

Sex ratios by sections and divisions.—There was a deficiency of males in the Negro population in the South as a whole in 1930, and an excess in the Negro population in the North and West. Within the South itself the sex ratio was lowest in the South Atlantic division and highest in the West South Central division. During the period 1910 to 1930, the ratio of males to females in the Negro population decreased in the North, the West, and the South, as well as in all the divisions of the South.

Sex ratios in urban and rural areas.—The rural Negro population was predominantly male and the urban Negro population was predominantly female in 1930. The sex ratio for rural areas was 101.7 as compared with 91.3 for urban areas. A higher sex ratio existed for the Negro population in rural-nonfarm areas than in either the rural-farm or urban areas. The preponderance of females in the Negro population in urban areas is doubtless due primarily to the fact

that cities afford more opportunities for gainful employment of women than do the rural districts.

The excess of females in the urban population was much greater in the South than in the North and West and, among the Southern divisions, in the South Atlantic division, in which the sex ratio was 85.7.

Sex ratios in the "Black Belt."—In the aggregate for the counties in which the population was 50 percent or more Negro in 1930, the proportion of males was smaller than it was in the aggregate for the other counties in the United States. In fact, in only two Southern States, Virginia and Tennessee, was there an excess of males over females in the counties having 50 percent or more Negro population. The difference in the sex ratios between counties in which Negroes constituted 50 percent or more of the population, and counties having a smaller proportion of Negroes, may be associated with the tendency of the Negroes to move out of the Black Belt. It would appear that this tendency was stronger among the males than among the females.

Sex ratios in cities.—The excess of females over males was not as great in the larger cities as it was in the smaller cities. The sex ratio in the cities of the South was decidedly lower than for cities of the North and West. The ratio of males to 100 females was lower in the South than in the North and West for cities having 10,000 or more Negro inhabitants in 1930. The sex ratio for the cities with 2,500 to 10,000 Negro inhabitants was 82.9 in the South and 98.6 in the North in 1930.

TABLE 1.—NEGRO POPULATION OF THE UNITED STATES, BY SEX: 1820 TO 1930

CENSUS YEAR	Total	Male	Female	EXCESS OF—		Males per 100 females	INCREASE OVER PRECEDING CENSUS			
				Males	Females		Males		Females	
							Number	Percent	Number	Percent

¹ The combined Negro population for Bluefield city, Mercer County, W. Va., and Bluefield town, Tazewell County, Va.: males 1,748; females 1,900; males per 100 females, 92.

CHAPTER VIII.—AGE DISTRIBUTION

The age classification.—At every census, some attempt has been made to distribute the population by age. The age classification is based upon the age at the last birthday, that is, the age in completed years.

Apart from the abnormalities in age distribution due to immigration, there are some irregularities in the age distribution by single years which are due to errors in the census returns. Ages may be misstated, either intentionally or through ignorance of the true age on the part of the person giving the information. Where the age is not accurately known, there is a tendency to report it in multiples of 2 or 5, or even, in case of ages above 20, as a multiple of 10. There is also a tendency to concentrate on age 21 for men. In general, the degree of accuracy is greater for adults than for children. The errors at all ages are greatest for those classes of population in which the proportion of illiterates is the greatest. The returns also exaggerate the number of Negro and Indian centenarians. The age distribution of Negroes, if ages were accurately reported, would approximate that of native whites of white parentage, except that the younger groups would be relatively larger and the older groups smaller, because the life span of Negroes is shorter than that of whites. The number of Negroes in the age group under 5, as compared with that of 5 to 9, shows approximately the extent of the underenumeration of young Negro children, while the irregularities in the older age group are the results of the tendency to report ages in multiples of 2, 5, and 10.

In general, the age distribution for Negro males is more symmetrical and appears to be more accurate than that for females. The number of females in the age group 20 to 24 years was larger in 1930 than the expected survivorship from the age group 10 to 14 years as returned in 1920. This excess is undoubtedly due to the understatement of age. Prior censuses and censuses of other countries show similar age discrepancies that can be accounted for only by erroneous returns. The variation in the percent in each group as between males and females is probably the result of the understatement of age by Negro females. On the whole, the returns present a reasonably accurate age distribution, and, when greater accuracy is necessary, it is always possible to make adjustments for obvious inaccuracies.

Distribution by 5-year age groups.—About 53 per cent of the Negro population in 1930 was less than 25 years of age, as compared with 46.9 percent for the white population. There was a greater percent of Negro population in each age group under 25 years than for the white population. The percent of the Negro population in each group over 45 years was less than for the white population. The migration of the Negroes to the North and West has affected the age distribution in those two sections. Hence, the percent of the Negro population in the lower age groups in those two sections was not so great as for the country as a whole. Over 52 percent of the Negro population was in the age group 24 or under in 1930. The proportion of the native white population falling into this group was practically the same as that for the Negro.

There was an increase from 1920 to 1930 in the number of Negroes in each 5-year age group, except for the group 100 years and over. Children 2 to 14 years of age constituted a smaller percent of the total Negro population in 1930 than in 1920. With the exception of the age group 20 to 24 years, the percent of the Negro population in each age was greater in 1930 than in 1920 for every age group from 15 to 45 years.

Median age.—The median age, or the age which divides a population into two equal groups, the number older being exactly equal to the number younger, was 23.4 years in 1930 as compared with 22.3 years in 1920 for the Negro population. The median age for the Negro population has been increasing at each census since 1850. In 1850 the median age was 17.3; in 1860, 17.7; in 1870, 18.5; in 1900, 19.4; and in 1910, 20.8. This increase in the median age has been due to two causes—first, an increase in the average length of life; and, second, a reduction in the birth rate, which has resulted in a decrease in the proportion of young people in the population.

The median age of male Negroes was the same as that for native white males in 1930. The median age for Negro females was lower than that for Negro males or for native white females.

Age by sex.—In 1930 the number of females in the Negro population was greater than the number of males for every age under 45 years, except for the ages 4, 10, 12, and 41. The males outnumbered the females for every age from 45 to 70 years, with the exception of the age 48.

The proportion of Negro males in the total Negro population was equal to or greater than that for the females of all ages under 14 years. A greater proportion of the female Negro population than of the male Negro population was in the age group 15 to 39 years. For each age group over 40 years, with the exception of the age group 90 to 94 years, the proportion of the Negro male population in that age group equals or exceeds the proportion for the female population.

Urban, rural-farm, and rural-nonfarm population.—Since there are important differences in age distribution between the urban and rural areas and between farm and nonfarm population, separate figures have been given for these three subdivisions of the population.

For persons in each age group under 20 years, the rural percentages were higher than the urban in the United States as a whole, and also in the South and North. There was a pronounced difference between urban and rural areas in the proportion of Negroes in the more active age and in the lower age groups. The opportunities to be found in urban communities have attracted large numbers of persons in the more active ages. In urban areas more than one-half of the Negro population fell into the age group of 25 years and over, while in the rural areas over 59 percent of the Negro population fell into the age class under 25 years.

In urban areas there was an excess of males in all age groups from 40 to 59 years. In rural-nonfarm areas the number of males exceeded the number of females in every age group from 25 to 74 years. In the rural-farm areas the males exceeded the females in all the age groups from 5 to 19 years and from 45 to 84 years.

Number of males per 100 females by age groups.—There were less than 100 males per 100 females in every age group under 45 years in the Negro population in 1930. For the age groups 45 to 74 years the ratio of males per 100 females was greater than 100. The number of males per 100 females in each age group over 75 years gradually declined to 45.9 for the age group 100 years and over.

Age distribution by color and nativity.—Table 2 shows the percent distribution by 5-year age periods for the 1930 population of the United States, classified by color, nativity, and parentage. The Negro population figures on which these percentages are based appear in table 7.

NEGROES IN THE UNITED STATES

CHAPTER IX.—MARITAL CONDITION

The marital inquiry.—The inquiry regarding marital condition was first made in the census of 1880, but the results were not tabulated; the earliest Federal census figures on the marital condition are, therefore, those for 1890.

The terms "single", "married", "widowed", and "divorced", refer to the marital status at the time the census was taken. A person who has been widowed or divorced, but has remarried, is reported as married, so that the returns for widowed and divorced persons do not represent the total number of persons now living, who have been widowed or divorced. Since it is probable that some divorced persons are reported as single, married, or widowed, census returns doubtless understate somewhat the actual number of divorced persons who have not remarried.

For a small number of persons marital condition was not reported. When under 18 years old such persons were classified as single, otherwise as "unknown." Where space will conveniently permit, the "unknown" are shown separately in the tables; from other tables they are omitted, since they have no particular significance, and form only two-tenths of 1 percent of the total male population 15 years old and over, and one-tenth of 1 percent of the female. They are always included in the totals on which the percentages single, married, widowed, and divorced are computed. The percentages would be practically the same, however, if they were based on the number of persons for whom marital condition was reported.

The number of persons under 15 years of age, who are married, widowed, or divorced, is naturally very small, comprising in 1930, 133 Negro males, and 1,027 Negro females. In most of the tables, therefore, statistics on the marital condition are presented only for persons 15 years of age and over, since the total population in this age group forms a more logical base for the computation of percentages single, married, etc., than would the aggregate population of all ages.

Marital condition and sex.—Of the total number of Negro males 15 years of age and over, 59.8 percent were married, 32.2 percent were single, 6.3 percent were widowed, and 1.4 percent were divorced. Of the Negro females 15 years old and over, 58.5 percent were married, 23.3 percent were single, 15.9 percent were widowed, and 2.2 percent were divorced.

In the Negro population of 15 years old and over, the excess of females over males amounted to 158,090 in 1930. Among single persons, the Negro males exceeded the Negro females by 317,144. The principal reason for this disparity in unmarried persons is in the tendency of men to marry at a later age than women.

There were at the same time almost three times as many widows as widowers in the Negro population in 1930. This excess of widows over widowers is due primarily to the greater longevity of women than of men. The excess is made still greater by the fact that men usually marry at later ages than women, so that even aside from the greater longevity of women, marriage is more likely to be broken by the death of the husband than by the death of the wife. The excess of widows over widowers is naturally correlative to the excess of single men over single women.

Marital condition and age.—Age composition is an important factor in the statistics of marital conditions.

The proportion of Negro males married, in each age group, increased from 3.7 percent for males 15 to 19 years of age to 78.9 percent for males 45 to 49 years of age. For the age groups over 50 years of age the percent married gradually declined to approximately 51 percent for males 75 years old and over. The proportion of Negro females married, in each age group, increased from 20.5 percent for females 15 to 19 years of age to 75.2 percent for females 35 to 39 years of age. For the age groups over 40 years the proportion of females married decreases to 14.9 percent for those 75 years old and over. More than one-half of the Negro females 65 years old and over were widowed.

In the early age groups, the ratio of married to single is larger for females than for males, but the excess of females gradually decreases with each advance in age period, until in the old age periods, the ratio is reversed, and there are nearly twice as many married men as married women. Widows, on the other hand, outnumber widowers in all age groups. Single males exceed single females in all age groups, but in the older age periods, the excess of males is more than counterbalanced by the excess of widows over widowers.

The median age at marriage.—From tabulation by single years, it is possible to arrive at an approximation of the median age of first marriage. The true median age at first marriage could only be computed from tabulation of records of all first marriages in a given period. In the earlier years, however, nearly all marriages are first marriages, and the number of persons who are, or who have been, married increases rapidly with every year of age. In these ages, also, there are comparatively few deaths for persons who are, or who have been, married. Therefore, it may be assumed that the age at which exactly 50 percent of the persons enumerated are, or have been, married, and at which 50 percent remain single, will practically coincide with the median age at first marriage. The median age at first marriage of both Negro males and females is earlier than that for any other racial group, and approximately 2 years earlier than for native whites. The median age for Negro males was 2.8 years greater in 1930 than for Negro females.

Marital condition in urban, rural-farm, and rural-nonfarm areas.—Although the percentage of Negro males 15 years old and over who were married was higher in urban than in rural-farm areas in 1930, the percent married in each age group was greater in the rural-farm than in the urban areas. The percentage of Negro males 15 years old and over who were single was greater in rural-farm areas but the percentage decreased relatively much more in the rural-farm areas as the age increased.

The percent of Negro females 15 years old and over who were married, was greater in rural-farm areas than in urban areas.

TABLE 1.—MEDIAN AGE AT MARRIAGE, BY SEX, COLOR, AND NATIVITY, FOR THE UNITED STATES: 1930

COLOR AND NATIVITY	Male	Female
All classes.....	23.8	21.4

CHAPTER X—FERTILITY

PROPORTION OF CHILDREN TO WOMEN OF CHILDBEARING AGE

Fertility relates to the ratio of children under 5 years of age to the number of women of child-bearing age.

Children under 5 years of age per 1,000 women.—The number of Negro children under 5 years of age per 1,000 females 15 to 44 years of age decreased from 429 to 393 during the decade 1920 to 1930. Comparative data for 1920, 1910, and 1900 indicate even greater changes in the proportion of children, showing a total decrease during the 30 years of 189 children per 1,000 females, as compared with a decrease of 122 for white children. In the North, there was a decline in the proportion of Negro children from 317 in 1900 to 295 in 1930; in the South, from 619 to 423; and in the West, from 269 to 239. In the United States as a whole, there was an increase during the 20 years, 1910 to 1930, of 696,696 Negro females, 15 to 44 years of age, and a decrease of 33,082 children under 5 years of age.

In 1900 there were 14 States, all in the South, in which the proportion of children to 1,000 females ranged from 500 in Delaware to 712 in South Carolina. At the census of 1910, the number of such States had been reduced to 10. By 1920 only 2 States, North Carolina and South Carolina, reported ratios of 500 or more children to females. In 1930, North Carolina was the only State in which the proportion of children to 1,000 females was greater than 500. New Hampshire, Maine, and Vermont have been omitted in considering these ratios for each year, due to their inappre-

ciable Negro population. Among the States having, in 1930, 5,000 or more females 15 to 44 years old, California had the lowest ratio—226 children per 1,000 females; followed by New York with 251; the District of Columbia, 252; Illinois, 256; and Missouri, 268. In all of these States the ratio was considerably below the general average of 393 for the United States. However, the ratio of children to females showed an increase in 1930 as compared with 1920 in 26 States and the District of Columbia. Significant were the increases reported by such industrial States as Massachusetts, New York, New Jersey, Maryland, Pennsylvania, Ohio, Indiana, Illinois, and Michigan.

Children under 5 years of age per 1,000 women, in urban, rural-farm, and rural-nonfarm areas.—In 1930, the number of children under 5 years of age per 1,000 women, 15 to 44 years of age, was 268 in urban areas as compared with 567 in rural-farm and 426 in rural-nonfarm areas. The difference in the ratio between the urban and rural areas is more marked in the South than in either the North or West.

Children under 5 years of age per 1,000 married women.—The number of Negro children under 5 years of age per 1,000 married women 15 years old and over, declined from 561 to 513 during the period, 1920 to 1930. Since 1910, the number of Negro children under 5 years of age per 1,000 married women has decreased 198.

TABLE 1.—NUMBER, INCREASE, AND PROPORTION OF NEGRO AND WHITE WOMEN 15 TO 44 YEARS OF AGE, AND OF CHILDREN 10 YEARS OF AGE, UNDER 5, AND UNDER 1, FOR THE UNITED STATES: 1900 TO 1930

CHAPTER XI—SCHOOL ATTENDANCE

The school attendance inquiry.—The statistics of school attendance obtained in the census of 1930 are based upon the answer to a question on the Population Schedule as to whether the person enumerated had attended school or college at any time between September 1, 1929, and the census date, April 1, 1930. If the person had attended any kind of school, college, or other educational institution at any time within the period in question, an affirmative answer was to be made. The total number of persons returned as attending school is therefore larger than the number who were in attendance at any one time between September 1, 1929, and April 1, 1930.

In 1920 the question was asked in practically the same form, though since the census date was January 1 (instead of Apr. 1) the period covered was somewhat less and the returns may have been somewhat smaller than they would have been if the inquiry had been made in April. It is believed, however, that the difference is very small and that the figures for 1930 are fairly comparable with those for 1920 and for the earlier censuses, except possibly those for 1890 and 1900. At these two censuses the enumerators were required to ascertain not only the fact of school attendance but also the number of months of attendance. In some instances the person from whom the enumerator obtained his information would not know the number of months of school attendance, even though he knew the child had attended school. In a few of these cases the enumerator probably made no report at all with respect to school attendance. The returns for 1890 and 1900 are therefore doubtless less complete than those for the subsequent censuses and perhaps less complete than those for earlier censuses. In the censuses prior to 1890, and also in 1910, as well as 1920, the general form of the inquiry on school attendance was the same as in 1930.

The ages of compulsory school attendance vary in different States, beginning at 6 years in 2 States, 7 years in 29 States and the District of Columbia, and at 8 years in 17 States. The main body of pupils in the elementary school (grades 1 to 8) are included in group 7 to 13 years of age, hence, statistics are presented in more detail in this chapter for this group than for the others.

In a total Negro population of 11,891,143, there were 2,553,151 persons, constituting 21.5 percent of the total population, who had attended school sometime between September 1, 1929, and April 1, 1930. Comparing the different classes of the population, the proportion in school, with the exception of the foreign born, does not vary greatly from the average for all classes combined (22.8 percent); of the Negroes, 21.5 percent; of the white, 22.9 percent; and of the foreign born white, 3.8 percent, were attending school. Of course, these comparisons are for the total population, infants, adults, as well as children of school age. In the following discussion the figures for population and school attendance are limited to the school age periods.

Increase in school attendance.—Between 1920 and 1930 the number of Negroes between 5 and 20 years of age attending school increased by 447,042, and the number not attending school decreased by 115,001. Considered by age periods, the number of Negroes in school, 5 and 6 years of age, increased 33,512; the number 7 to 13 years of age, 249,581; the number 14

and 15 years of age, 68,147; the number 16 and 17 years of age, 63,888; and the number 18 to 20 years of age, 31,914. However, part of the increase in each of these age groups represents a growth of population and a part to improved conditions and greater interest in education.

School attendance by single years of age.—In 1930 the largest numbers reported as attending school were those for 10 years of age, while the highest percentage was for those for 11 years of age. The percent attending school increased from 12.7, for children 5 years of age, to 92.2 for those 11 years of age, and then decreased to 6.6 percent for those 20 years of age.

School attendance by sex.—There was an excess of females over males attending school in 1930 at every age from 5 to 20 years, due partly to an excess of 111,004 females over males between the ages of 5 and 20 years.

School attendance in urban and rural areas.—The percent attending school was greater in urban than in rural areas. The percentages for the United States were, for children 7 to 20 years of age, 67 for urban, and 63, for rural areas; for children 7 to 13 years of age, 94.2 in the urban, and 83.8 in the rural areas; for children 14 and 15 years of age, 83.7 in the urban, and 75.3 in rural areas; for 16 and 17 years, 49.2 in urban, and 44.8 in rural areas; and for 18 to 20 years, 13.9 for urban, and 12.9 for rural areas.

School attendance by sections, divisions, and States.—In 1930 the percent of the Negro children 5 to 20 years of age attending school was 75.1 in the West, 68.2 in the North, and 58.5 in the South. By years of age, the greatest difference in percent attending school between the South and the North and West was for the ages 5, 6, 7, 15, 16, and 17.

There were 3 States, all in the South, reporting less than 60 percent of the Negro children 7 to 20 years of age attending school in 1930; 20 States, 11 in the South, 7 in the North, and 2 in the West, reporting between 60 and 70 percent; and the District of Columbia and 25 States, 14 in the North, 9 in the West, and 2 in the South, reporting 70 percent or more of the Negro children 7 to 20 years of age, attending school.

School attendance in cities.—The divergencies shown in the percent of the Negroes 7 to 20 years of age attending school, between various cities, indicate that a number of factors affect school attendance. These factors cannot be summed up into any general statement, since the statistics for each city represent conditions existing in that city, and perhaps not elsewhere.

In Northern cities, generally, the percentage of Negroes attending school was higher than the percentage in Southern cities.

School attendance and gainful employment.—The main purpose in presenting the data on school attendance and gainful employment is to show the number of Negroes who were neither attending school nor engaged in a gainful occupation.

In 1930 there were 56,081 male Negroes, between the ages of 10 to 15 years; 26,531 Negroes, 16 and 17 years of age; 28,821 between the ages of 18 and 20, and 18,554 between the ages of 21 and 24 years who were neither gainfully occupied nor attending school.

Over 80 percent of the male Negroes, 10 to 15 years of age, over 60 percent of those 16 to 20 years of age, and

over 50 percent of those 21 to 24 years of age, who were neither gainfully employed nor attending school were in rural areas.

There were 61,594 Negro females, between 10 and 15 years of age; 48,219, 16 and 17 years of age; 72,985, between the ages of 18 and 20, and 47,567 between 21

and 24 years of age who were neither married nor gainfully occupied nor attending school in 1930.

More than two-thirds of the Negro females 10 to 24 years of age who were neither married nor gainfully employed nor attending school in 1930 were in rural areas.

CHAPTER XII.—ILLITERACY

The illiteracy classification.—The Census Bureau defines as "illiterate" any person 10 years of age or over who is not able to read and write either in English or in some other language. The classification is based on the answers given to the enumerator in response to the question "Whether able to read and write." No specific test of ability to read and write was prescribed, but the enumerators were instructed not to return the answer "Yes" (which would classify the person as literate) simple because the person was able to write his or her name.

Statistics of illiteracy were first obtained for the entire population 10 years old and over in 1870. In the several censuses prior to 1930, two questions have been asked, namely, "Whether able to read" and "Whether able to write", and illiteracy has been defined as inability to write, "regardless of ability to read." As a matter of fact, the figures for illiterates presented in most of the tables in the Reports of the 1920 Census represent persons who were unable both to read and write, since every person tabulated as able to write was also counted as able to read. The earlier statistics are therefore strictly comparable with the 1930 figures obtained through the use of the consolidated question.

It should be noted that ability to read and write cannot be defined precisely as to cover all cases with certainty. A person may know the alphabet and a small number of printed words and yet not be able to read in a true sense; or he may be able to write his name or other disconnected words, but wholly unable to express his thoughts in writing in any satisfactory fashion. In general, the illiterate population, as shown by the census, may be assumed to comprise only those persons who have had no education whatever.

Color and nativity.—The variations in the proportion of illiterates in the several color and nativity classes reflect the education opportunities, past and present, which have been open to them in the different sections of the United States, and in the case of the foreign born in the countries from which they have come.

The decidedly higher percentage of illiteracy for the native whites of native parentage than for the native whites of foreign or mixed parentage results largely from the fact that a much larger proportion of the former class is found in the rural communities, where school attendance has been less general than in the cities. Further, most of the rural native whites of foreign or mixed parentage live in States where educational facilities, even in the country, are relatively good. In order to make a fair comparison between any two elements of the population, therefore, in regard to illiteracy, the statistics for individual cities and for urban and rural areas in individual States should be examined.

There has been a rapid decrease in Negro illiteracy during the 60 years. In 1930, the illiterates constituted 16.3 percent of the Negroes 10 years old and over, as compared with 22.9 percent in 1920, 30.4 percent in 1910, 44.5 percent in 1900, 57.1 percent in 1890, 70 percent in 1880, and 81.4 percent in 1870. There were 1,513,892 Negro illiterates 10 years old and over in 1930, 1,842,161 in 1920, 2,227,731 in 1910, 2,853,194 in 1900, 3,042,668 in 1890, 3,220,878 in 1880, and 2,789,689 in 1870.

Illiteracy by sex.—The percentage illiterate among Negro males 10 years old and over was 17.6 as compared with 15.1 for females. The proportion illiterate among Negro females was smaller than for males in 1930 for each group up to 45 years of age. For the age groups 45 to 54 years and 65 years and over, the percentage illiterate among the males was considerably less than among the females.

Illiteracy by age.—The results of the extension of educational opportunities from decade to decade are brought out clearly by the statistics of illiteracy for the various age periods. The illiteracy shown for persons in each age period measures the lack of educational advantages during the childhood and youth of that age group. If school facilities should make no further growth from now on, there would nevertheless be a gradual reduction in illiteracy for several decades to come, as the older and more illiterate population died out; and the general level of illiteracy would gradually approach that found at present in the younger age groups. The improvement in educational facilities can be seen by making a comparison of the percentages of illiteracy for the age groups 10 to 14, and 15 to 19, as shown by the census figures for 1900, 1910, 1920, and 1930.

In 1930, there was a gradual increase in the percentage of illiteracy with each advancing age group. There was a decrease between 1920 and 1930 in the percentage of illiteracy in each age group. It is interesting to note that as regards the individuals composing, respectively, the several age groups, the percentage illiterate among the survivors has decreased from census to census. For example, the persons who were 15 to 24 years of age in 1910, so far as they were living at succeeding censuses, were 25 to 34 years of age in 1920, and 35 to 44 years of age in 1930. The percentage illiterate for this group of Negroes decreased from 22 in 1910 to 17.9 in 1920 and 16.8 in 1930. In general, the proportion illiterate decreased in each decade among the survivors, both male and female, for each age group.

Illiteracy by sections, geographic divisions, and States.—In illiteracy, as in every other phase of Negro life in the United States, chief interest centers about conditions in the South. Of the 1,513,892 Negro illiterates, 10 years old and over, in the United States in 1930, 1,416,417, or 93.6 percent, were in the South. The percentage illiterate for Negroes in 1930 was 19.7 in the South as compared with 4.7 in the North and 3.3 in the West. The percentage illiterate in the Negro population 10 years of age and over in the South decreased from 33.3 in 1910 to 26.0 in 1920, and to 19.7 in 1930. Comparing the three Southern divisions, the highest percentage of illiteracy was in the East South Central division and the lowest in the West South Central.

There were 5 States in which the proportion of the Negro illiterates 10 years old and over was greater than 20 percent, 5 States in which the percent was between 15 and 20, and 5 States in which the percent was between 10 and 15. All of the 15 States having 10 percent or more illiterate were in the South. Between 1920 and 1930, the percentage illiterate in the Negro population in the 15 States having 10 percent or more illiterate in 1930 decreased.

Illiteracy in counties and cities.—In 1930 there were 213 counties, all in the South, in which 25 percent or more of the Negro population 10 years old and over was illiterate. The counties were distributed by States as follows: Alabama, 38; Georgia, 34; Louisiana, 29; South Carolina, 27; Mississippi, 21; Florida, 19; Virginia, 18; North Carolina, 12; Kentucky, 6; Tennessee, 4; Texas, 2; Maryland, 2; and Arkansas, 1.

In 1930, 16 out of the 80 cities having 10,000 or more Negro inhabitants reported a percentage of illiteracy

of the Negro population 10 years old and over greater than that for the United States as a whole.

Urban and rural illiteracy.—Among the Negroes, the proportion illiterate in the rural-farm population exceeds that in the rural-nonfarm and the urban population. In 1930, of the 1,513,892 Negro illiterates, 794,866 were in rural-farm areas, 323,177 were in rural-nonfarm areas, and 395,849 in urban areas, the percentage illiteracy being 23.2 in the rural-farm, 20.5 in the rural-nonfarm, and 9.2 in the urban population, 10 years of age and over.

CHAPTER XIII.—FAMILIES

The family classification.—The decennial population census in the past has been mainly a compilation of statistics in which the individual person has been the unit. All recent censuses, however, have recognized the family as a unit to the extent of inquiring whether the home in which the family lives is owned or rented; and the schedules have shown the composition of the family by recording for each person his or her relationship to the head of the family—whether that of wife, son, granddaughter, mother-in-law, lodger, servant, or other relationship.

The term "family", as used in the tabulation of results of the 1930 census, is limited in the main to what might be called private families, excluding the institutions and hotel or boarding-house groups which have been counted as families in prior censuses. Therefore a family may be defined as, in general, a group of persons related either by blood or by marriage or adoption, who live together as one household, usually sharing the same table. Single persons living alone were counted as families, as also were a few small groups of unrelated persons sharing the same living accommodations as "partners." Households reporting more than 10 lodgers were classified as boarding or lodging households, rather than as families. Two or more related persons occupying permanent quarters in a hotel were counted as a private family rather than as a part of the hotel group.

Since a home is defined as the living quarters occupied by a family, the number of homes is always the same as the number of families. In the classification by tenure a home was counted as owned if it was owned wholly or in part by any related member of the family. A home was counted as rented if it was not owned by any member of the family, even though no specific cash rental was paid. Living accommodations received as part of the man's salary or wages, or occupied free under any other conditions were thus counted as rented.

The value of the home, as reported in the census of 1930, was the approximate current market value of the home and referred to only nonfarm homes. The monthly rental was secured for each nonfarm family returned as occupying rented quarters. If the rent was not paid by the month then the equivalent monthly rental or approximate rental value for a month was to be reported.

The statistics relating to radio sets, showing the number of families having a radio set, did not represent the total number of radio sets in existence or used, since one family may have had two or more sets and since there were a considerable number of sets in use in nonfamily or nonhome establishments.

Size of families.—In 1930, of the 2,803,756 Negro families, 12.1 percent were comprised of 1 person, 26.4 percent of 2 persons, 17.9 percent of 3 persons, 12.9 percent of 4 persons, 9.5 percent of 5 persons, and 21.3 percent of 6 or more persons. The median size of the Negro family was 3.15 persons as compared with 3.34 for native-white families. The median size of the family in the South exceeded the median size for Negro families in the North and West.

Families classified by number of children.—There were no children under 10 years in 1,655,217, or 59 percent, of the Negro families reported at the census of 1930, 1 child under 10 years of age in 467,575, or 16.7 percent, of all Negro families, and 2 children under 10 years of age in 288,572, or 10.3 percent, of the Negro families. Of the 2,803,756 Negro families, there were 1,151,361, or 41.1 percent, in which there were no children under 21 years of age and 530,461, or 18.9 percent, in which there was 1 child under 21 years per family.

Families with lodgers.—In 1930, 84.8 percent of the Negro families had no lodgers, 8.7 percent had 1 lodger, 3.5 percent had 2 lodgers, and 2.9 percent had 3 or more lodgers.

Age of head of the family.—The age classification presented here is limited to those families with a man head. Hence, this classification applies to 80.7 percent of all Negro families. Of all the Negro families having a man head, 8.9 percent were under 25 years of age, 24.9 percent were 25 to 34 years of age, 25.8 percent were 35 to 44 years, 22.2 percent were 45 to 54 years, 11.6 percent were 55 to 64 years, and 6.4 percent were 65 years old and over.

Ownership of homes.—In 1930 of the 2,803,756 Negro homes, 669,645 or 23.9 percent were owned, and 2,050,217 or 73.1 percent were rented. Of the total number of homes, 65 percent were nonfarm homes and 35 percent were farm homes. Of the nonfarm homes, 26.4 percent were owned and 70.8 percent were rented, while 19.3 percent of the farm homes were owned and 77.4 percent rented. Between 1900 and 1930 the number of homes owned increased 296,195 or 79.3 percent, while the number of homes rented increased 714,941 or 53.5 percent. In the West, 37 percent of the Negro families owned their homes in 1930; in the South, 24.4 percent; and in the North, 21.1 percent.

Value of owned nonfarm homes and monthly rentals of rented nonfarm homes.—In 1930, of the 480,324 Negro-owned nonfarm homes, 39.3 percent had a value under \$1,000; 13.8 percent, a value of \$1,000 to \$1,499; 8.8 percent, a value of \$1,500 to \$1,999; 12.4 percent, a value of \$2,000 to \$2,999; 12.4 percent, a value of \$3,000 to \$4,999; and 10.8 percent, a value of \$5,000 or more.

The median value of Negro-owned nonfarm homes was \$1,341 in 1930. In the South, 48.5 percent of the nonfarm homes, as compared with 14.8 percent in the North and 9.3 percent in the West, had a value under \$1,000.

Of the 1,290,697 Negro-rented nonfarm homes, 37.2 percent had a monthly rental of less than \$10, 18.7 percent a rental of \$10 to \$14, 10.4 percent a rental of \$15 to \$19, 14.6 percent a rental of \$20 to \$29, 11.6 percent a rental of \$30 to \$49, and 4.7 percent a rental of \$50 or more per month in 1930. The median monthly rental of rented nonfarm homes was \$13.04. In the South, 53.5 percent of the rented nonfarm homes, as compared with 9.1 percent in the West and 6.4 percent in the North, had a monthly rental under \$10.

Employment status of homemaker.—A "homemaker" was defined as that woman member of the family who was responsible for the care of the home and family. (Hired housekeepers were not counted as homemakers.) In 1930, 62.5 percent of the Negro homemakers were not gainfully employed. Of those gainfully employed, 47.6 percent were gainfully employed as servants, waitresses, etc.; 19.5 percent were gainfully employed at home in agricultural occupations; 14.4 percent in other occupations at home; 7.4 percent were employed as industrial workers; and 11.1 percent were employed in other occupations. Homemakers returned as engaged in agricultural occupations at home consist in part of women operating their own farms and in part of women on the farm on which they live without wages.

Families having radio sets.—In 1930, 7.5 percent of all Negro families had a radio set. More than 14 percent of urban families had radio sets as compared with 0.3 percent for rural-farm families and 3 percent for rural-nonfarm families. A much larger percent of the Negro families in the North and West than in the South had radio sets in 1930.

Number of gainful workers per family.—Of all Negro families, 3.1 percent had no gainful workers, 54.7 percent had 1 gainful worker, 27.1 percent had 2 gainful workers, 8.9 percent had 3 gainful workers, and 6.3 percent had 4 or more gainful workers in 1930.

TABLE 22.—MEDIAN SIZE OF FAMILY, AND MEDIAN VALUE OR RENTAL OF NONFARM HOMES, BY COLOR, AND NATIVITY OF HEAD, FOR THE UNITED STATES: 1930

COLOR AND NATIVITY OF HEAD	Median size of family	Median value of owned non-farm homes	Median monthly rental of rented non-farm homes
All classes.....	3.40	\$4,778	\$27.15
Negro.....	3.15	1,341	13.04
Native white.....	3.34	4,766	27.92
Foreign-born white.....	3.74	5,576	33.00
Other races.....	4.13	(¹)	12.28

¹ Less than \$1,000.

TABLE 23.—FAMILIES HAVING SERVANTS LIVING IN THE HOME, BUT NO LODGERS, BY COLOR, AND NATIVITY OF HEAD, FOR THE UNITED STATES: 1930

[Families designated as "having servants" include only those reporting servants living in the home and no lodgers. This combination was obtained as a byproduct of the tabulation by number of lodgers, but the mechanical restrictions were such that it was not possible to obtain data for families having both servants and lodgers]

COLOR AND NATIVITY AND TENURE	TOTAL FAMILIES			URBAN FAMILIES			RURAL-FARM FAMILIES			RURAL-NONFARM FAMILIES		
	Total number	Having servants living in home		Total number	Having servants living in home		Total number	Having servants living in home		Total number	Having servants living in home

NEGROES IN THE UNITED STATES

TABLE 28.—HOMES OF NEGRO FAMILIES BY TENURE, BY SECTIONS, DIVISIONS, AND STATES:
1930, 1920, 1910, AND 1900

[Figures for 1930 and 1900 represent private-family homes alone; those for 1920 and 1910 include the premises occupied by the small number of institutions and other quasi-family groups which were counted as families in the respective censuses]

AREA AND TENURE	1930		1920		1910		1900		INCREASE OR DECREASE (—)

TABLE 28.—HOMES OF NEGRO FAMILIES BY TENURE, BY SECTIONS, DIVISIONS, AND STATES:
1930, 1920, 1910, AND 1900—Continued

[Figures for 1930 and 1900 represent private-family homes alone; those for 1920 and 1910 include the premises occupied by the small number of institutions and other quasi-family groups which were counted as families in the respective censuses]

AREA AND TENURE	1930		1920		1910		1900		INCREASE OR DECREASE (—)							
	Number	Per- cent distrib- ution	Number	Per- cent distrib- ution	Number	Per- cent distrib- ution	Number	Per- cent distrib- ution	1900 to 1930		1920 to 1930		1910 to 1920		1900 to 1910	
									Number	Per- cent	Number	Per- cent	Number	Per- cent	Number	Per- cent

CHAPTER XIV.—OCCUPATIONS

The classification by occupation.—The census of 1930 sought to secure a definite statement of the occupation of each person engaged in gainful labor. The term gainful worker, in census usage, includes all persons who usually follow a gainful occupation, although they may not have been employed at the time the census was taken. It does not include women doing housework in their own homes without wages and having no other employment, nor children working at home, merely at general household work, chores, or at odd times at other work. The occupations returned for children under 10 years old were not compiled, hence all data presented in this chapter refer to gainful workers 10 years old and over.

The occupation classifications used in the census of 1930 differ somewhat from those used in the census of 1920. It has been necessary, for comparison, to assign a few of the occupational groups, as determined in the census of 1920, to general divisions of occupation different from those under which they were presented in 1920. Furthermore, in 1930, an occupational designation returned by the enumerators occasionally was assigned to an occupational group different from that under which it was classified in 1920. Since modifications of this kind in the initial classification of individual cases may be reflected in the 1930 figures, it is evident that a small increase or decrease in the number of workers shown in an occupation may be due to a difference in classification. The same is true, for the same reason, in regard to a small increase or decrease from 1910 to 1920.

Number of Negroes gainfully employed.—Of the 9,292,556 Negroes 10 years old and over, 5,503,535 were gainfully occupied in 1930. Of the Negro population, 59.2 percent were gainfully occupied in 1930 as compared with 47 percent for the native white population and 56.1 percent for the foreign-born white population.

More than 80 percent of the total male Negro population 10 years old and over were gainfully occupied in 1930, as compared with 73.4 percent for the male native white population, and over 38 percent of the female Negro population 10 years old and over as compared with 20.5 percent for the female native white population.

Number of Negroes gainfully occupied by sections.—In 1930, 58.5 percent of the Negroes, 45.6 percent of the native white, and 56.9 percent of the foreign-born white population 10 years old and over in the South were gainfully occupied; 61.6 percent of the Negroes, 47.4 percent of the native white, and 55.8 percent of the foreign-born white in the North; and 62.4 percent of the Negroes, 48.8 percent of the native white, and 58.1 percent of the foreign-born white population 10 years old and over in the West. Although increases were reported in 1930 over 1920 in the number of persons in each section who were gainfully occupied, the ratio of those occupied to the total population of persons 10 years old and over decreased in the South from 49.6 percent to 49.1 percent, in the North from 50.5 percent to 49.5 percent, and in the West from 51.1 percent to 50.5 percent.

Proportion of the gainfully occupied Negroes in the various occupation groups.—Of the 5,505,535 gainful Negro workers shown in the 1930 census, 36.1 percent were occupied in agriculture; 28.6 percent in domestic and personal service; 18.6 percent in manufacturing

and mechanical industries; 7.2 percent in transportation and communication; 3.3 percent in trade; 2.5 percent in professional service; 1.4 percent in the extraction of minerals, and the remaining 2.2 percent in public service, clerical occupations, and in forestry and fishing.

Since 1910 there has been a marked decrease in the proportion of gainful Negro workers occupied in agriculture and a marked increase in those occupied in domestic and personal service.

Negroes gainfully occupied by occupation groups by sections.—The Negro gainful workers in the North and West were largely occupied in domestic and personal service and in the manufacturing and mechanical industries, while those in the South were occupied largely in agriculture and in domestic and personal service.

Distribution of Negro gainful workers in the various occupation groups by sex.—In 1930, 40.7 percent of the male Negro gainful workers were occupied in agriculture; 25.2 percent in manufacturing and mechanical industries; 11.6 percent in domestic and personal service, and 10.8 percent in transportation and communication. The female Negro gainful workers were occupied in the main in domestic and personal service and in agriculture.

Distribution by occupation groups per 1,000 Negroes gainfully occupied.—A larger proportion of the Negro gainful workers than of the native white and foreign born white gainful workers were occupied in agriculture. In 1930 there were in agriculture, 361 Negroes per 1,000 gainfully occupied as compared with 214 native whites and 91 foreign-born whites. In domestic and personal service there were 287 Negroes per 1,000 gainfully occupied Negroes as compared with 66 for native white and 127 for foreign-born white.

Occupations in which Negroes predominate.—The Negro gainful workers exceeded those of all other classes in 10 occupations in 1930. Of the 911,943 persons engaged in these occupations, 72 percent were Negroes. The Negro workers in these occupations constituted 11.9 percent of the Negroes 10 years old and over reported as gainfully occupied in 1930. Over 75 percent of the launderers and laundresses (not in laundries) were Negroes and more than 68 percent of the cooks (other than in hotels, restaurants, and boarding houses) were Negroes in 1930.

Negro inhabitants per professional person.—In 1930 there was 1 Negro clergyman for every 475 Negro inhabitants, 1 college professor or college president for every 5,541 inhabitants, 1 dentist for every 6,707 inhabitants, 1 lawyer or judge or justice for every 9,536 inhabitants, 1 musician or teacher of music for every 1,124 inhabitants, 1 physician or surgeon for every 3,125 inhabitants, 1 school teacher for every 218 inhabitants, and 1 trained nurse for every 2,076 inhabitants.

Age of Negro gainful workers in 1930.—The percentage of Negroes gainfully occupied is of the total Negro population by ages as follows: 10 to 13 years, 10.8; 14 years, 23.3; 15 years, 30.2; 16 years, 41; 17 years, 51.3; 18 and 19 years, 60; 20 to 24 years, 67.9; 25 to 29 years, 70.1; 30 to 34 years, 71; 35 to 39 years, 71.6; 40 to 44 years, 72.2; 45 to 49 years, 72.7; 50 to 54 years, 73.7; 55 to 59 years, 72.4; 60 to 64 years, 68.2; 65 to 69 years, 62; 70 to 74 years, 50.6; 75 years and over, 32.5

NEGROES IN THE UNITED STATES

The percentage of the male Negro gainful workers occupied by age groups were as follows: 10 to 13 years, 13.3; 14 years, 29.8; 15 years, 39.7; 16 years, 54.5; 17 years, 68.1; 18 and 19 years, 81.7; 20 to 24 years, 93.5; 25 to 29 years, 96.6; 30 to 34 years, 96.9; 35 to 39 years, 97.1; 40 to 44 years, 97.2; 45 to 49 years, 97.2; 50 to 54 years, 96.7; 55 to 59 years, 95.6; 60 to 64 years, 92.6; 65 to 69 years, 87.7; 70 to 74 years, 76.2; and 75 years and over, 54.2. The corresponding percentages for female Negro gainful workers were: 10 to 13 years, 8.4; 14 years, 17.0; 15 years, 21.3; 16 years, 28.6; 17 years, 35; 18 and 19 years, 41.5; 20 to 24 years, 46; 25 to 29 years, 46.9; 30 to 34 years, 46.9; 35 to 39 years, 47.7; 40 to 44 years, 47.8; 45 to 49 years, 46.9; 50 to 54 years, 45.5; 55 to 59 years, 42.3; 60 to 64 years, 38.3; 65 to 69 years, 32.5; 70 to 74 years, 23.5; and 75 years and over, 13.2

Over 75 percent of the male Negro gainful workers from 10 to 17 years of age were occupied in agriculture. Fully 66 percent of the male Negro gainful workers

between 10 and 19 years of age, and about 59 percent of those over 60 years of age, were occupied in agriculture.

The female Negro gainful workers between 10 and 17 years of age were occupied in the main in agriculture, while a large portion of the female Negro gainful workers over 17 years of age were occupied in personal and domestic service. The percentages of female workers in each age group, who are occupied in domestic and personal service decrease with each age group over 29, while the corresponding age groups occupied in agriculture increase.

Number of Negro children 10 to 15 years old gainfully employed.—Of the 740,290 male Negroes 10 to 15 years old in the United States there were 150,000, or 20.3 percent, reported as gainfully occupied in 1930. Of the 751,689 female Negroes 10 to 15 years old, 90,007, or 12 percent, were reported as gainfully occupied. Over 98 percent of the Negro children 10 to 15 years old gainfully occupied in 1930 were in the South.

NEGROES IN THE UNITED STATES

TABLE 10.—OCCUPATIONAL GAINS AND LOSSES MADE BY NEGROES IN THE MANUFACTURING AND MECHANICAL INDUSTRIES, FOR THE UNITED STATES: 1920 TO 1930

[Data for 1920 have been made comparable with those for 1930 by excluding those occupations which were classified in "Manufacturing and mechanical industries" group in 1920 but transferred to other groups in 1930; similarly, certain occupations classified in other groups in 1920 but included in the "Manufacturing and mechanical industries" in 1930 have been included in 1920 data]

[Percent not shown where base is less than 100]

OCCUPATION	1930	1920	INCREASE OR DECREASE (—)		OCCUPATION	1930	1920	INCREASE OR DECREASE (—)	
			Num-ber	Per-cent				Num-ber	Per-cent
Manufacturing and mechanical industries	1,024,656	901,181	123,475	13.7	Plumbers and gas and steam fitters	4,729	3,516	1,213	34.5

¹ Doubtless some overlapping between persons engaged in the production and distribution of natural gas and artificial gas; also those working at petroleum refineries or pipe lines and those at oil wells.² In some cases it was difficult to distinguish, from the enumerators' returns, persons working in butter, cheese, and condensed-milk factories from persons working for milk distributing companies or persons working on dairy farms.³ Sometimes it was impossible, from the enumerators' returns, to distinguish between workers in stockyards and workers in slaughter and packing houses.⁴ Includes tin-plate mills. Doubtless some overlapping between workers in blast furnaces and steel rolling mills and workers in iron manufacturing establishments.⁵ Sometimes it was impossible, from the enumerators' returns, to distinguish between workers in car and railroad shops and workers on steam and street railroads.⁶ Includes iron foundries.⁷ Includes box factories (wood).⁸ Sometimes it was impossible, from the enumerators' returns, to distinguish between workers at airports and workers in airplane factories.⁹ Some owners of hand laundries probably are included with laundry operatives.

OCCUPATIONS

297

TABLE 14.—NUMBER OF GAINFULLY OCCUPIED NEGRO WOMEN 15 YEARS OLD AND OVER, BY MARITAL CONDITION, WITH A DISTRIBUTION OF THE SINGLE AND UNKNOWN AND OF THE MARRIED BY AGE, BY SECTIONS, DIVISIONS, AND STATES: 1930

¹ Data are included in these columns which are not shown separately in certain States, but are included in the "All other" item.² The difference between agricultural statistics of the census of occupations and those of the census of agriculture is largely due to the fact that every farm operator is listed as a farmer in the latter, while in the former, he is listed under his principal occupation.³ Includes, also, managers and superintendents of retail stores.⁴ Some deliverymen probably were returned and classified as chauffeurs, and others as teamsters or truck drivers.⁵ Teamsters in agriculture, forestry, and the extraction of minerals are classified with the other workers in those industries, respectively; drivers for bakeries and stores are classified as deliverymen in trade; and drivers for laundries are classified as deliverymen in domestic and personal service.⁶ Includes tin-plate mills.⁷ Includes box factories (wood).⁸ Some owners of hand laundries are probably included with laundry operatives.⁹ Except telegraph messengers.

NEGROES IN THE UNITED STATES

TABLE 24.—NEGRO GAINFUL WORKERS 10 YEARS OLD AND OVER, BY

[Of the 534 occupations and occupation groups of the census classification]

	OCCUPATION	10 YEARS OLD AND OVER			10 TO 17 YEARS		18 AND 19 YEARS		20 TO 24 YEARS		25 TO 29 YEARS		30 TO 34 YEARS
